Baker, 2016-12-01 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched Corpus linguistics has much to offer history being as both disciplines engage so heavily in analysis of large amounts of textual material This book demonstrates the opportunities for exploring corpus linguistics as a method in historiography and the humanities and social sciences more generally Focussing on the topic of prostitution in 17th century England it shows how corpus methods can assist in social research and can be used to deepen our understanding and comprehension McEnery and Baker draw principally on two sources the newsbook *Mercurius Fumigosis* and the Early English Books Online Corpus This scholarship on prostitution and the sex trade offers insight into the social position of women in history **Corpus Stylistics in Heart of Darkness and its Italian Translations** Lorenzo

Mastropierro, 2017-11-16 This book explores the interaction between corpus stylistics and translation studies It shows how corpus methods can be used to compare literary texts to their translations through the analysis of Joseph Conrad's *Heart of Darkness* and four of its Italian translations The comparison focuses on stylistic features related to the major themes of *Heart of Darkness* By combining quantitative and qualitative techniques Mastropierro discusses how alterations to the original's stylistic features can affect the interpretation of the themes in translation The discussion illuminates the manipulative effects that translating can have on the reception of a text showing how textual alterations can trigger different readings This book advances the multidisciplinary dialogue between corpus linguistics and translation studies and is a valuable resource for students and researchers interested in the application of corpus approaches to stylistics and translation **Investigating**

Adolescent Health Communication Kevin Harvey, 2014-02-25 A comprehensive corpus analysis of adolescent health communication is long overdue and this book provides it We know comparatively little about the language adolescents use to articulate their health concerns and discourse analysis of their choices can shed light on their attitudes towards and beliefs about health and illness This book interrogates a two million word corpus of messages posted by adolescents to an online health forum It adopts a mixed method corpus approach to health communication combining both quantitative and qualitative techniques Analysis in this way gives voice to an age group whose subjective experiences of illness have often

been marginalized or simply overlooked in favour of the concerns of older populations

Multimodality and Active Listenership Dawn Knight, 2011-10-13 Current corpora are invaluable resources for generating accurate and objective analyses of patterns of language use However spoken corpora are effectively mono modal presenting data in the same physical medium text The reality of a discourse situation is lost in its representation as text Using multimodal data sets when conducting corpus based pragmatic analyses is one solution This book looks at multimodal corpora in some depth using backchanneling as the conversational feature to be analysed It provides a bottom up investigation of the issues and challenges faced at every stage of multimodal corpus construction and analysis as well as providing an in depth linguistic analysis of a cross section of multimodal corpus data The collaborative and co operative nature of backchannels is highlighted in this book and an adapted pragmatic functional linguistic coding matrix for the characterisation of backchanneling phenomena is presented Dawn Knight also looks at possible directions in the construction and use of multimodal corpus linguistics

The Prosody of Formulaic Sequences Phoebe Lin, 2018-09-20 To apply the same approaches to analysing spoken and written formulaic language is problematic to do so masks the fact that the contextual meaning of spoken formulaic language is encoded to a large extent in its prosody In The Prosody of Formulaic Sequences Phoebe Lin offers a new perspective on formulaic language arguing that while past research often treats formulaic language as a lexical phenomenon the phonological aspect of it is a more fundamental facet This book draws its conclusions from three original empirical studies of spoken formulaic language assessing intonation unit boundaries as well as features such as tempo and stress placement Across all studies Lin considers questions of methodology and conceptual framework The corpus based descriptions of prosody outlined in this book not only deepen our understanding of the nature of formulaic language but have important implications for English Language Teaching and automatic speech synthesis

Berman, 2020-03-18 The goal of the volume is to shed fresh light on Modern Hebrew from perspectives aimed at readers interested in the domains of general linguistics typology and Semitic studies Starting with chapters that provide background information on the evolution and sociolinguistic setting of the language the bulk of the book is devoted to usage based studies of the morphology lexicon and syntax of current Hebrew Based primarily on original analyses of authentic spoken and online materials these studies reflect varied theoretical frames of reference that are largely model neutral in approach To this end the book presents a functionally motivated dynamic approach to actual usage rather than providing strictly structuralist or formal characterizations of particular linguistic systems Such a perspective is particularly important in the case of a language undergoing accelerated processes of change in which the gap between prescriptive dictates of the Hebrew Language Establishment and the actual usage of educated literate but non expert speaker writers of current Hebrew is constantly on the rise Theories in Second Language Acquisition Bill VanPatten, Gregory D. Keating, Stefanie Wulff, 2025-07-03 This fourth edition of the best selling *Theories in Second Language Acquisition* surveys the major theories and frameworks currently used in second language acquisition SLA research serving as an ideal introductory text for graduate students in SLA and language teaching Designed

to provide a consistent and coherent presentation for those seeking a basic understanding of the theories and frameworks that underlie contemporary SLA research each chapter focuses on a single theory Chapters are written by leading scholars in the field and incorporate a basic foundational description of the theory relevant data or research models used with this theory common misunderstandings and a sample study from the field to show the theory in practice New to this fully revised edition is the incorporation of a new theoretical framework to replace several lesser used theories A key work in the study of second language acquisition this volume will be useful to students of linguistics language and language teaching and to researchers as a guide to theoretical work outside their respective domains *Linguistic Knowledge and Language Use*

Recent Perspectives on Task-Based Language Learning and Teaching Mohammad Ahmadian, María del Pilar García Mayo, 2017-12-04 The last three decades have witnessed a growth of interest in research on tasks from various perspectives and numerous books and collections of articles have been published focusing on the notion of task and its utility in different contexts Nevertheless what is lacking is a multi faceted examination of tasks from different important perspectives This edited volume with four sections of three chapters each views tasks and Task based Language Teaching TBLT from four distinct but complementary vantage points In the first section all chapters view tasks from a cognitive interactionist angle with each addressing one key facet of either cognition or interaction or both in different contexts CALL and EFL ESL Section two hinges on the idea that language teaching and learning is perhaps best conceptualized understood and investigated within a complexity theory framework which accounts for the dynamicity and interrelatedness of the variables involved Viewing TBLT from a sociocultural lens is what connects the chapters included in the third section Finally the fourth section views TBLT from pedagogical and curricular vantage points
