Earth's Climate William F. Ruddiman, 2008

Earth's Climate summarises the major lessons to be learned from 550 million years of climate changes as a way of evaluating the climatological impact on and by humans in this century. The book also looks ahead to possible effects during the next several centuries of fossil fuel use.

Sustainable Development (2 Volume Set) C.A. Brebbia, 2015-10-06

This collection of research papers presented at meetings organised by the Wessex Institute of Technology (WIT) concerns a variety of issues relating to the area of sustainable development. WIT has a long and very successful record of organising conferences on the topic of sustainability, which requires an interdisciplinary approach. Any sustainable solutions that are derived solely from the perspective of a single discipline may have unintended damaging consequences that create new problems. Thus, effective sustainable solutions require the collaboration of scientists and engineers from various disciplines, as well as planners, architects, environmentalists, policy makers, social scientists and economists. The contents of this book reflect that interdisciplinary approach and include topics under the main areas of Sustainable development and planning, Disaster management, Air pollution, Urban transport, Ecosystems and Water resources management.

The Public Face of Wilkie Collins Vol 3 Andrew Gasson, Graham Law, William Baker, 2024-10-28

The editors have transcribed 2,500 of Wilkie Collins's letters; around 700 of them previously unidentified, and have given them all a full scholarly annotation and context. The letters shed light on the personal life and business activities of this creative Victorian personality.
