The Palgrave Encyclopedia of Urban and Regional Futures Robert C. Brears, 2023-01-13 While urban settlements are the drivers of the global economy and centres of learning, culture, and innovation, and nations rely on competitive dynamic regions for their economic, social, and environmental objectives, urban centres and regions face a myriad of challenges that impact the ways in which people live and work, create wealth, and interact and connect with places. Rapid urbanisation is resulting in urban sprawl, rising emissions, urban poverty, and high unemployment rates, housing affordability issues, lack of urban investment, low urban financial and governance capacities, rising inequality, and urban crimes, environmental degradation, increasing vulnerability to natural disasters, and so forth.
