The Urban Revolution Henri Lefebvre, 2003 Originally published in 1970 *The Urban Revolution* marked Henri Lefebvre's first sustained critique of urban society a work in which he pioneered the use of semiotic structuralist and poststructuralist methodologies in analyzing the development of the urban environment Although it is widely considered a foundational book in contemporary thinking about the city *The Urban Revolution* has never been translated into English until now This first English edition deftly translated by Robert Bononno makes available to a broad audience Lefebvre's sophisticated insights into the urban dimensions of modern life Lefebvre begins with the premise that the total urbanization of society is an inevitable process that demands of its critics new interpretive and perceptual approaches that recognize the urban as a complex field of inquiry Dismissive of cold modernist visions of the city particularly those embodied by rationalist architects and urban planners like Le Corbusier Lefebvre instead articulates the lived experiences of individual inhabitants of the city In contrast to the ideology of urbanism and its reliance on commodification and bureaucratization the capitalist logic of market and state Lefebvre conceives of an urban utopia characterized by self-determination individual creativity and authentic social relationships A brilliantly conceived and theoretically rigorous investigation into the realities and possibilities of urban space *The Urban Revolution* remains an essential analysis of and guide to the nature of the city

Urban Revolutions Stefan Kipfer, 2022-09-19 What do struggles over pipelines in Canada housing estates in France and

New Urban Spaces Neil Brenner,2019-05-24 The urban condition is today being radically transformed Urban restructuring is accelerating new urban spaces are being consolidated and new forms of urbanization are crystallizing In *New Urban Spaces* Neil Brenner argues that understanding these mutations of urban life requires not only concrete research but new theories of urbanization To this end Brenner proposes an approach that breaks with inherited conceptions of the urban as a bounded settlement unit the city or the metropolis and explores the multiscalar constitution and periodic rescaling of the capitalist urban fabric Drawing on critical geopolitical economy and spatialized approaches to state theory Brenner offers a paradigmatic account of how rescaling processes are transforming inherited formations of urban space and their variegated consequences for emergent patterns and pathways of urbanization The book also advances an understanding of critical urban theory as radically revisable key urban concepts must be continually reinvented in relation to the relentlessly mutating worlds of urbanization they aspire to illuminate
