Nichols,David C. Berliner,2007-03-01 Drawing on their extensive research Nichols and Berliner document and categorize the ways that high stakes testing threatens the purposes and ideals of the American education system For more than a decade the debate over high stakes testing has dominated the field of education This passionate and provocative book provides a fresh perspective on the issue and powerful ammunition for opponents of high stakes tests Their analysis is grounded in the application of Campbell's Law which posits that the greater the social consequences associated with a quantitative indicator such as test scores the more likely it is that the indicator itself will become corrupted and the more likely it is that the use of the indicator will corrupt the social processes it was intended to monitor Nichols and Berliner illustrate both aspects of this corruption showing how the pressures of high stakes testing erode the validity of test scores and distort the integrity of the education system Their analysis provides a coherent and comprehensive intellectual framework for the wide ranging arguments against high stakes testing while putting a compelling human face on the data marshalled in support of those arguments **Skill and Mastery** Karyn Lai,Wai Wai Chiu,2019-07-12 Skill and Mastery Philosophical Stories from the Zhuangzi presents an illuminating analysis of skill stories from the Zhuangzi a 4th century BCE Daoist text In this intriguing text that subverts conventional norms and pursuits ordinary activities such as swimming cicada catching and wheelmaking are executed with such remarkable efficacy and spontaneity that they seem like magical feats An international team of scholars explores these

stories in their philosophical historical and political contexts Their analyses highlight the stories underlying conceptions of agency character and cultivation and relevance to contemporary debates on human action and experience The result is a valuable collection opening up new lines of inquiry in comparative East West philosophical debates on skill cultivation and mastery as well as cross disciplinary debates in psychology cognitive science and philosophy

Critical Perspectives on Activity Peter Sawchuk, Newton Duarte, Mohamed Elhammoumi, 2006-01-16 The last two decades have seen an international explosion of interest in theories of mind culture and activity This unique collection is the first to explicitly reach back to the tradition s original critical impulse within which the writings of Karl Marx played such a central role Each author pushes this impulse further to address leading contemporary questions It includes a diverse array of international scholars working from the fields of education psychology philosophy sociology anthropology communications industrial relations and business studies Broken into three main sections education work and everyday life each chapter builds from an analysis of practice and learning as social cultural participation and historical change in relation to the concept of activity contradiction and struggle This book offers insight into an important complex of overlapping practices and institutions to shed light on broader debates over such matters as the knowledge economy and lifelong learning

Liberal Democracy as the End of History Christopher Hughes, 2012-02-20 Francis Fukuyama claims that liberal democracy is the end of history This book provides a theoretical re examination of this claim through postmodernist ideas The book argues that postmodern ideas provide a valuable critique to Fukuyama s thesis and poses the questions can we talk about a universal and teleological history a universal human nature or an autonomous individual It addresses whether postmodern theories concerning the movement of time what it means to be human and what it means to be an individual subject can be accommodated within a theory of a history that ends in liberal democracy The author argues that incorporating elements of postmodern thought into Fukuyama s theory makes it possible to produce a stronger and more compelling account of the theory that liberal democracy is the end of history The result of this is to underpin Fukuyama s theory with a more complex understanding of the movement of time the human and the individual and to show that postmodern concepts can paradoxically be used to strengthen Fukuyama s theory that the end of history is liberal democracy The book will be of interest to students and scholars of political theory postmodernism and the work of Francis Fukuyama

Dependent Rational Animals Alasdair MacIntyre, 1999-08-10 MacIntyre one of the foremost ethicists of the past half century makes a sustained argument for the centrality in well lived human lives of both virtue and local communities of giving and receiving He criticizes the mainstream of Western ethics including his own previous position for not taking seriously the dependent and animal sides of human nature thereby overemphasizing the powers of reason and the pursuit of reason and the pursuit of autonomy This important work in ethics is essential for the professional philosopher and is highly readable for students at all levels and for thoughtful citizens Choice

Those Who Act Ruin It Jacob Bender, 2024-07-01 Drawing on both western and Chinese philosophy *Those Who Act Ruin It*

shows how Daoism presents a viable alternative to established moral theories The Daoist critical of the Confucian and Mohist discourses of their time provides an account of morality that can best be understood as achieving an attunement to situations through the cultivation of habits Furthermore Daoism s meta ethical insights outline how moral philosophy when theorized in a way that ignores our fundamental interdependence devolves into moralistic narcissism Another way of putting this as the Daodejing states perfectly is that those who act ruin it Sensitive to this problem the Daoist account of moral attunement can ameliorate social woes and not ruin things In their moral attunement Daoists can spontaneously respond to situations in ways that are sensitive to the underlying interdependence of all things

Pragmatic Perspectives in Phenomenology Ondrej Svec, Jakub Capek, 2017-06-26 Pragmatic Perspectives in Phenomenology offers a complex analysis of the pragmatic theses that are present in the works of leading phenomenological authors including not only Heidegger and Merleau Ponty as it is often the case within Hubert Dreyfus tradition but also Husserl Levinas Scheler and Patocka Starting from a critical reassessment of existing pragmatic readings which draw especially on Heidegger s account of Being in the world the volume s chapters explore the following themes as possible justifications for speaking about the pragmatic turn in phenomenology the primacy of the practical over theoretical understanding criticism of the representationalist account of perception and consciousness and the analysis of language and truth within the context of social and cultural practices Having thus analyzed the pragmatic readings of key phenomenological concepts the book situates these readings in a larger historical and thematic context and introduces themes that until now have been overlooked in debates including freedom alterity transcendence normativity distance and self knowledge This volume seeks to refresh the debate about the phenomenological legacy and its relevance for contemporary thought by enlarging the thematic scope of pragmatic motives in phenomenology in new and revealing ways It will be of interest to advanced students and scholars of phenomenology who are interested in moving beyond the analytic continental divide to explore the relationship between practice and theory
