Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does

Guide to Marx's 'Capital' Vols III Kenneth Smith, 2012-11-15 This book provides a comprehensive guide to all three volumes of Karl Marx's *Capital* with advice on further reading and points for further discussion. Recognizing the contemporary relevance of *Capital* in the midst of the current financial crisis, Kenneth Smith has produced an essential guide to Marx's ideas, particularly on the subject of the circulation of money capital. This guide uniquely presents the three volumes of *Capital* in a different order of reading to that in which they were published, placing them instead in the order that Marx himself sometimes recommended as a more user-friendly way of reading. Dr. Smith also argues that for most of the twentieth century, the full development of the capitalist mode of production (CMP) has been undermined by the existence of a non-capitalist third world, which has caused the CMP to take on the form of what Marx called a highly developed mercantile system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop. While the guide can be read as a book in its own right, it also contains detailed references to Volumes I-III so that students, seminars, and discussion groups can easily make connections between Smith's explanations and the relevant parts of *Capital*.
