A Modern Guide to Uneven Economic Development Erik S. Reinert, Ingrid H. Kvangraven, 2023-01-13 In contrast to neo classical mainstream approaches to economics this innovative Modern Guide addresses the complex reality of economic development as an inherently uneven process exploring the ways of theorizing and empirically exploring the mechanisms with which the unevenness manifests itself It covers a wide array of issues influencing wealth and poverty technological innovation ecology and sustainability financialization population gender and geography considering the dynamics of cumulative causations created by the interplay between these factors

Routledge International Handbook of Social and Environmental Change Stewart Lockie, David A. Sonnenfeld, Dana R. Fisher, 2013-10-30 Today the risks associated with global environmental change and the dangers of extreme climatic and geological events remind us of humanity's dependence on favourable environmental conditions Our relationships with the landscapes and ecologies that we are a part of the plants and animals that we share them with and the natural resources that we extract lie at the heart of contemporary social and political debates It is no longer possible to understand key social scientific concerns without at the same time also understanding contemporary patterns of ecosystem change The Routledge International Handbook of Social and Environmental Change reviews the major ways in which social scientists are conceptualizing more integrated perspectives on society and nature from the global to local levels The chapters in this volume by international experts from a variety of disciplines explore the challenges contradictions and consequences of social ecological change along with the uncertainties and governance dilemmas they create The contributions are based around the themes of Climate change energy and adaptation Urban environmental change and governance Risk uncertainty and social learning Re assembling social ecological systems With case studies from sectors across both developed and developing

worlds the Handbook illustrates the inter connectedness of ecosystem health natural resource condition livelihood security social justice and development It will be of interest for students and scholars across the social sciences and natural sciences as well as to those interested and engaged in environmental policy at all levels

A Companion to World History Douglas Northrop, 2014-12-15 A COMPANION TO WORLD HISTORY This new volume offers insightful reflections by both leading and emerging world historians on approaches methodologies arguments and pedagogies of a sub discipline that has continued to be in flux as well as in need of defining itself as a relevant alternative to the traditional national regional or chronological fields of inquiry Choice The focus on the practicalities of how to do world history probably gives it its edge Its thirty three chapters are grouped into sections that address how to set up research projects in world history how to teach it how to get jobs in it how to frame it and how it is done in various parts of the globe It is an actual handbook in other words as opposed to a sample of exemplary work English Historical Review A Companion to World History offers a comprehensive overview of the variety of approaches and practices utilized in the field of world and global history This state of the art collection of more than 30 insightful essays including contributions from an international cast of leading world historians and emerging scholars in the field identifies continuing areas of contention disagreement and divergence while pointing out fruitful directions for further discussion and research Themes and topics explored include the lineages and trajectories of world history key ideas and methods employed by world historians the teaching of world history and how it draws upon and challenges traditional approaches and global approaches to writing world history By considering these interwoven issues of scholarship and pedagogy from a transnational interregional and world global scale fresh insights are gained and new challenges posed With its rich compendium of diverse viewpoints A Companion to World History is an essential resource for the study of the world s past

The Environment in World History Stephen Mosley, 2010-02-25 Covering the last five hundred years of global history The Environment in World History examines the processes that have transformed the Earth and put growing pressure on natural resources Chapters and case studies explore a wide range of issues including the hunting of wildlife and the loss of biodiversity in nearly every part of the globe the clearing of the world s forests and the development of strategies to halt their decline the degradation of soils one of the most profound and unnoticed ways that humans have altered the planet the impact of urban industrial growth and the deepening ecological footprints of the world s cities the pollution of air land and water as the inevitable trade off for continued economic growth worldwide The Environment in World History offers a fresh environmental perspective on familiar world history narratives of imperialism and colonialism trade and commerce and technological progress and the advance of civilisation and will be invaluable reading for all students of world history and environmental studies

Perspectives on Ecocriticism Ingemar Haag, Karin Molander Danielsson, Marie Öhman, 2019-05-08 This volume gathers together papers presented at the conference Ecocriticism in the Nordic Countries Yesterday Today Tomorrow held in V ster s Sweden in 2017 organized by the research group Ecocritical Forum at M lardalen

University The conference which was an attempt to survey local ecocritical activities transcended Nordic boundaries engaging scholars from Europe and the United States This expansion from the local to the global mirrors the subject of the conference ecocriticism a cross disciplinary field of research in the intersection of environmental issues and cultural expressions The chapters here engage with topical issues such as the Anthropocene sustainability in education and civilizational critique as well as schools of thought such as materialism dark ecology and animal studies The contributions discuss several types of cultural expressions including film and other visual media university course design and Nordic and English language novels and poetry This volume will attract the interest of readers from a number of different backgrounds both in the Nordic countries and internationally

Routledge Handbook of Environmental Conflict and Peacebuilding
Ashok Swain, Joakim Öjendal, 2018-04-17 The past two decades have witnessed the emergence of a large body of research examining the linkage between environmental scarcity violent conflict and cooperation However this environmental security polemic is still trying to deliver a well defined approach to achieving peace Studies are being undertaken to find the precise pathways by which cooperative actions are expected not only to pre empt or moderate resource conflicts but also to help diffuse cooperative behaviour to other disputed issues The recognition that environmental resources can contribute to violent conflict accentuates their potential significance as pathways for cooperation and the consolidation of peace in post conflict societies Conceived as a single and reliable reference source which will be a vital resource for students researchers and policy makers alike the Routledge Handbook of Environmental Conflict and Peacebuilding presents a wide range of chapters written by key thinkers in the field organised into four key parts Part I Review of the concept and theories Part II Review of thematic approaches resources scarcity intervention adaptation and peacebuilding Part III Case studies Middle East Iraq Jordan Liberia Nepal Colombia Philippines Part IV Analytical challenges and future oriented perspectives Enabling the reader to find a concise expert review on topics that are most likely to arise in the course of conducting research or policy making this volume presents a truly global overview of the key issues and debates in environmental conflict and peacebuilding

Ecological Law and the Planetary Crisis Geoffrey Garver, 2020-10-29 This book uses a transdisciplinary systems approach to examine how Earth s human caused ecological crisis arose and presents a new legal approach for overcoming it Ecological Law and the Planetary Crisis first examines how the history of humanity s social metabolism along with the history of human inventions and ideas led to the human Earth dilemma we see today and explains why contemporary law is inadequate for confronting this dilemma The book goes on to propose ecological law law that maintains human activity within ecological limits such as planetary boundaries while ensuring social justice and equity as an essential element of an urgently needed radical pathway of change toward a perpetual mutually enhancing human Earth relationship Finally it offers a systems based analytical tool for organizing actions to promote the transition from environmental to ecological law Increasing the visibility clarity and development of ecological law this book will be of great interest to students and scholars of ecological and

environmental law and governance Evolutionary History Edmund Russell, 2011-04-11 We tend to see history and evolution springing from separate roots one grounded in the human world and the other in the natural world Human beings have however become probably the most powerful species shaping evolution today and human caused evolution in other species has probably been the most important force shaping human history This book introduces readers to evolutionary history a new field that unites history and biology to create a fuller understanding of the past than either can produce on its own Evolutionary history can stimulate surprising new hypotheses for any field of history and evolutionary biology How many art historians would have guessed that sculpture encouraged the evolution of tuskless elephants How many biologists would have predicted that human poverty would accelerate animal evolution How many military historians would have suspected that plant evolution would convert a counter insurgency strategy into a rebel subsidy With examples from around the globe this book will help readers see the broadest patterns of history and the details of their own life in a new light Commodity Frontiers and Global Capitalist Expansion Sabrina Joseph, 2019-06-19 This interdisciplinary edited collection explores the dynamics of global capitalist expansion through the concept of the commodity frontier Applying an inductive approach rather than starting at the global level as most meta narratives have done this book sheds light on how local dynamics have shaped the process of capitalist expansion into uncommodified spaces Contributors demonstrate that ultimately the evolution of frontier zones and their reconfiguration over time have transformed human ecology labour relations and social economic and political structures across the globe Chapters examine agricultural and pastoral frontiers natural habitats and commodity frontiers with fossil fuels and mineral resources located in various regions of the world including South America Asia Africa and the Arabian Gulf **Comparing Globalizations** Thomas D. Hall, 2017-11-17 This work explores essential debates on globalization and world systems analysis It begins with a review of theoretical insights from world systems analysis and explains the evolution of its terminology The book subsequently seeks to answer several important questions When did globalization begin and what insights into contemporary globalization may be gained from older forms How does globalization differ in different places and how can different instances of globalization be compared Who is affected by globalization how are they affected and how do these effects vary if at all over time and space As world systems analysis and studies of globalization require interdisciplinary expertise the contributing authors draw on many fields including anthropology economics geography philosophy political science sociology and world history The book s overall goal is to facilitate the dialogue between approaches that at times seem to talk at cross purposes and to extend an invitation to scholars from many different areas to explore globalization Global Ecology and Unequal Exchange Alf Hornborg, 2012-03-29 In modern society we tend to have faith in technology But is our concept of technology itself a cultural illusion This book challenges the idea that humanity as a whole is united in a common development toward increasingly efficient technologies Instead it argues that modern technology implies a kind of global zero sum game involving uneven

resource flows which make it possible for wealthier parts of global society to save time and space at the expense of humans and environments in the poorer parts We tend to think of the functioning of machines as if it was detached from the social relations of exchange which make machines economically and physically possible in some areas But even the steam engine that was the core of the Industrial Revolution in England was indissolubly linked to slave labour and soil erosion in distant cotton plantations And even as seemingly benign a technology as railways have historically saved time and accessed space primarily for those who can afford them but at the expense of labour time and natural space lost for other social groups with less purchasing power The existence of technology in other words is not a cornucopia signifying general human progress but the unevenly distributed result of unequal resource transfers that the science of economics is not equipped to perceive Technology is not simply a relation between humans and their natural environment but more fundamentally a way of organizing global human society From the very start it has been a global phenomenon which has intertwined political economic and environmental histories in complex and inequitable ways This book unravels these complex connections and rejects the widespread notion that technology will make the world sustainable Instead it suggests a radical reform of money which would be as useful for achieving sustainability as for avoiding financial breakdown It brings together various perspectives from environmental and economic anthropology ecological economics political ecology world system analysis fetishism theory semiotics environmental and economic history and development theory Its main contribution is a new understanding of technological development and concerns about global sustainability as questions of power and uneven distribution ultimately deriving from the inherent logic of general purpose money It should be of interest to students and professionals with a background or current engagement in anthropology sustainability studies environmental history economic history or development studies

Research Handbook on Global Climate Constitutionalism Jordi

Jaria-Manzano, Susana Borràs, 2019-12-27 Climate change is causing traditional political and legal concepts to be revisited The emergence of a global polity through physical economic and social interaction demands global responses which should be founded upon new principles and which cannot simply be modelled on traditional constitutionalism centred on the nation state This Research Handbook explores how to build this climate constitutionalism at a global level starting from the narrative of Anthropocene and its implications for law It provides a critical approach to global environmental constitutionalism analysing the problems of sustainability and global equity which are entwined with the causes and consequences of climate change The Handbook explores how to develop constitutional discourses and strategies to address these issues and thereby tackle the negative effects of climate change whilst also advancing a more sustainable equitable and responsible global society

Elgar Encyclopedia of Environmental Sociology Christine Overdevest, 2024-04-12 The Elgar Encyclopedia of Environmental Sociology serves as a repository of insight on the complex interactions challenges and potential solutions that characterize our shared ecological reality Presenting innovative thinking on a comprehensive range

of topics expert scholars researchers and practitioners illuminate the nuances complexities and diverse perspectives that define the continually evolving field of environmental sociology

Solar Technology and Global Environmental Justice

Andreas Roos, 2023-02-02 Building on insights from ecological economics and philosophy of technology this book offers a novel interdisciplinary approach to understand the contradictory nature of Solar photovoltaic PV technology Solar photovoltaic PV technology is rapidly emerging as a cost effective option in the world economy However reports about miserable working conditions environmentally deleterious mineral extraction and toxic waste dumps corrode the image of a problem free future based on solar power Against this backdrop Andreas Roos explores whether ecologically unequal exchange an asymmetric transfer of labour time and natural resources is a necessary condition for solar PV development He demonstrates how the massive increase in solar PV installation over recent years would not have been possible without significant wage price differences in the world economy notably between Europe North America and Asia and concludes that solar PV development is currently contingent on environmental injustices in the world economy As a solution Roos argues that solar technology is best coupled with strategies for degrowth which allow for a transition away from fossil fuels and towards a socially just and ecologically sustainable future This book will be of great interest to students and scholars of solar power philosophy of technology and environmental justice
