The subject matter covers terms used in surgery, general practice, hospitals, nursing, pharmacy, dentistry, and other specializations. The level of language varies from the very technical to informal usage, as between professionals or between professionals and patients. Each of the 12,000 headwords is defined in simple English using a limited vocabulary of 500 words over and above those words which actually appear in the dictionary as main words. At the back of the book are a series of supplements which give useful information in tabular form; these refer to vitamins, incubation periods, SI equivalents, diets, and notes on eponymous words.
