Century U. S. Army Combatives Field Manual U. S. Department of Defense Staff, 2002-04-01 The preface to this U S Army
manual FM 3 25 150 states This field manual contains information and guidance pertaining to rifle bayonet fighting and hand
to hand combat The hand to hand combat portion of this manual is divided into basic and advanced training This manual
serves as a guide for instructors trainers and soldiers in the art of instinctive rifle bayonet fighting According to the manual
Hand to hand combat is an engagement between two or more persons in an empty handed struggle or with hand held
weapons such as knives sticks or projectile weapons that cannot be fired Proficiency in hand to hand combat is one of the
fundamental building blocks for training the modern soldier Soldiers must be prepared to use different levels of force in an
environment where conflict may change from low intensity to high intensity over a matter of hours Many military operations
such as peacekeeping missions or noncombatant evacuation may restrict the use of deadly weapons Hand to hand
combatives training will save lives when an unexpected confrontation occurs More importantly combatives training helps to
instill courage and self confidence With competence comes the understanding of controlled aggression and the ability to
remain focused while under duress Training in combatives includes hard and arduous physical training that is at the same
time mentally demanding and carries over to other military pursuits The overall effect of combatives training is the
culmination of a successful physical fitness program enhancing individual and unit strength flexibility balance and
cardiorespiratory fitness and building personal courage self confidence self discipline and esprit de corps As such this
manual provides a unique heavily illustrated training manual for a number of hand to hand combat techniques Chapter Three
deals with basic ground fighting techniques Basic ground fighting techniques build a fundamental understanding of dominant
body position which should be the focus of most combatives training before moving on to the more difficult standing
techniques Ground fighting is also where technique can most easily be used to overcome size and strength Before any killing
or disabling technique can be applied the soldier must first gain and maintain dominant body position The leverage gained
from dominant body position allows the fighter to defeat a stronger opponent An appreciation for dominant position is
fundamental to becoming a proficient fighter because it ties together what would otherwise be a long confusing list of
unrelated techniques If a finishing technique is attempted from dominant position and fails the fighter can simply try again If
on the other hand a finishing technique is attempted from other than dominant position and fails it will usually mean defeat
Attacks include the collar choke single wing choke straight arm bar arm lock guillotine choke scissors sweep Captain Kirk
ankle grab knee push triangle choke knee mount leg attacks straight ankle lock and figure four ankle lock Striking called an

integral part of all actual fighting includes pass the guard with strikes striking from side control defending against strikes and more Takedowns and throws are covered in detail Later chapters cover handheld weapons using the bayonet or knife which may be the ideal weapon to dispatch the enemy Field expedient weapons are discussed including the entrenching tool three foot sticks and six foot pole Standing defense techniques against unarmed and armed opponents are reviewed Restrictive force scenarios include two against one three against two one against two and two against three
