Disenchantment (中国) Vol. I: Fracture (1980-1983) By Zhang Kangkang, 2025-09-18. This is a book about memory and forgetting. The 1980s grow increasingly distant, occasionally returning with wind and snow but transformed to dust or drizzle or wavering suspended in the tainted air like a deathless specter. That decade marking the end of our youth has the desolate beauty of an elegy ushering in our middle age. It has the solemn and stirring quality of a processional. Gravity has smashed the past into fragments that only words can laboriously piece together. While knowing that it is merely a pointless addendum, a futile reboot, a belated tribute, I have stubbornly attempted to look back and write this book. Luo Yi once said: History is essentially a court that is constantly in retrial. One person's biased and narrow memories are trivial against the grand and stirring historical narrative written by the victors. But I've always forgotten what should be remembered and remembered what should be forgotten. The opus magnum of a writer who has experienced the whole period of the communist regime in China. *Disenchantment* is filled with scenes and stories oozing authenticity. Michel Bonnin. The author deconstructs the enchantment of ideology and reveals the brutal political violence of this period through the backgrounds and stories of her characters. Su Xiaokang. A stellar contribution to Chinese literature and the understanding of contemporary Chinese history. Michael Duke. A courageous and important work which deserves to be published in the Chinese speaking world and beyond. Richard King. An epic of an extraordinary age of great transformations and convulsions. Bernadette Y Li. A Chinese version of Doctor Zhivago. David Rong.

reference to the many new and excellent books on living primate ecology and adaptation a field that has burgeoned since the first edition of *Primate Adaptation and Evolution* By drawing out the key features of the extant families and referring to more detailed texts the author sets the scene and also creates space for a thorough updating of the exciting developments in primate palaeontology and the reconstruction through early hominid species of our own human origins This updated version covers recent developments in primate paleontology and the latest taxonomy and includes over 200 new illustrations and revised evolutionary trees This text is ideal for undergraduate and post graduate students studying the evolution and functional ecology of primates and early fossil hominids Long awaited revision of the standard student text on primate evolution Full coverage of newly discovered fossils and the latest taxonomy Over 200 new illustrations and revised evolutionary trees
