Instruments from its inception in the 1930s as a tiny geophysical exploration company working out of the back of a truck in the oilfields of the Southwest to its status in the world today as one of the world's leading electronics companies. From the determination of its founders Eugene McDermott, Erik Jonsson, Cecil Green and Pat Haggerty to the genius of its inventors such as Nobel prizewinner Jack Kilby, TI has transformed the world in seven and a half decades. In photographs and anecdotes, the book tells TI's history of innovation in products and technologies including the development of the first commercial silicon transistors, the first integrated circuits and the first electronic hand-held calculators. Today this Fortune 500 company is at the forefront of digital signal processing and analog technologies, the semiconductor engines of the Internet age. TIers are currently working on solutions for large global markets such as wireless and broadband access and for a variety of emerging markets such as digital projection systems and digital audio. The seventy-five vignettes making up this history paint a picture of TI and its people, providing a window into a corporate culture that fosters the creativity and mental toughness to compete in the world semiconductor market. The stories in addition show TI's staunch sense of fiscal responsibility, civic mindedness and high ethical standards in its business practices. *Screen Digest*, 2006 **HWM**, 2006-05.
