Russell,2020-09-08 Innovation is the hottest buzzword in business But what if our obsession with finding

the next big thing has distracted us from the work that matters most The most important book I've read in a long time It explains so much about what is wrong with our technology our economy and the world and gives a simple recipe for how to fix it Focus on understanding what it takes for your products and services to last Tim O'Reilly founder of O'Reilly Media It's hard to avoid innovation these days Nearly every product gets marketed as being disruptive whether it's genuinely a new invention or just a new toothbrush But in this manifesto on the state of American work historians of technology Lee Vinsel and Andrew L Russell argue that our way of thinking about and pursuing innovation has made us poorer less safe and ironically less innovative Drawing on years of original research and reporting The Innovation Delusion shows how the ideology of change for its own sake has proved a disaster Corporations have spent millions hiring chief innovation officers while their core businesses tank Computer science programs have drilled their students on programming and design even though the overwhelming majority of jobs are in IT and maintenance In countless cities suburban sprawl has left local governments with loads of deferred repairs that they can't afford to fix And sometimes innovation even kills like in 2018 when a Miami bridge hailed for its innovative design collapsed onto a highway and killed six people In this provocative deeply researched book Vinsel and Russell tell the story of how we devalued the work that underpins modern life and in doing so wrecked our economy and public infrastructure while lining the pockets of consultants who combine the ego of Silicon Valley with the worst of Wall Street's greed The authors offer a compelling plan for how we can shift our focus away from the pursuit of growth at all costs and back toward neglected activities like maintenance care and upkeep For anyone concerned by the crumbling state of our roads and bridges or the direction our economy is headed The Innovation Delusion is a deeply necessary reevaluation of a trend we can still disrupt

Secondhand Adam Minter, 2019-11-12 Revelatory terrifying but ultimately hopeful Elizabeth Kolbert Pulitzer Prize winning author of THE SIXTH EXTINCTION From the author of Junkyard Planet a journey into the surprising afterlives of our former possessions Downsizing Decluttering Discarding Sooner or later all of us are faced with things we no longer need or want But when we drop our old clothes and other items off at a local donation center where do they go Sometimes across the country or even halfway across the world to people and places who find value in what we leave behind In Secondhand journalist Adam Minter takes us on an unexpected adventure into the often hidden multibillion dollar industry of reuse thrift stores in the American Southwest to vintage shops in Tokyo flea markets in Southeast Asia to used goods enterprises in Ghana and more Along the way Minter meets the fascinating people who handle and profit from our rising tide of discarded stuff and asks a pressing question In a world that craves shiny and new is there room for it all Secondhand offers hopeful answers and hard truths A history of the stuff we've used and a contemplation of why we keep buying more it also reveals the marketing practices design failures and racial prejudices that push used items into landfills instead of new homes Secondhand shows us that it doesn't have to be this way and what really needs to change to build a sustainable future free of excess stuff
