Question Of Trust David Anderson,2015-06-11 This convenience copy of the official report by the UK Independent Reviewer of Terrorism Legislation made available under OGLv3 on a cost only basis Modern communications networks can be used by the unscrupulous for purposes ranging from cyber attack terrorism and espionage to fraud kidnap and child sexual exploitation A successful response to these threats depends on entrusting public bodies with the powers they need to identify and follow suspects in a borderless online world But trust requires verification Each intrusive power must be shown to be necessary clearly spelled out in law limited in accordance with international human rights standards and subject to demanding and visible safeguards The current law is fragmented obscure under constant challenge and variable in the protections that it affords the innocent It is time for a clean slate This Report aims to help Parliament achieve a world class framework for the regulation of these strong and vital powers Use of Market Data in the Recruitment of High Potentials

Jan Posthumus,2015-06-18 In his study Jan Posthumus uses the grounded theory method to explore the implementation of marketing instruments such as segmentation and targeting in the recruitment of high potentials in the pharmaceutical industry The implementation of these instruments can best be understood as the result of an interaction between four categories the identified internal need for certain groups of high potentials the scarcity of these groups of high potentials in the market the attitudes opinions and strategies within human resources and the technological capabilities Depending on the situation different recruitment instruments are used to recruit high potentials However the interviewees did not use an explicit high potential recruitment profile though they implicitly search for varying combinations of high potential characteristics such as intelligence and agility engagement the ability to perform in various environments and the ability to manage one's energy levels A Presuppositional Analysis of Specific Indefinites

Jae-Il Yeom,2015-12-22 First published in 1998 In this book the author presents the view that although many linguists have been interested in specific indefinites their theories are not quite satisfactory in that they have only tried to explore some aspects of specific indefinites This paper assumes a standard notion of specificity i e the notion of someone having in mind an individual or a relation Under this assumption there is an attempt to review previous studies on specific indefinites and propose a new theory of specificity which I believe can capture all aspects which the previous studies have explored This leads us to a new information theory which is partially representational and partially denotational and which is useful for dealing with conversational aspects like the distinction between the speaker and the audience *Proceedings - Intersociety Energy Conversion Engineering Conference* ,1972
