*The Independent Actor* Sally Ann Gritton, 2024-07-25 The Independent Actor presents a 21st century training route achievable by self curated learning for actors of all skill levels This book rejects a purist approach to actor training

challenges traditional acting styles and disregards the embedded elitist notions of Western training methods at the top of the hierarchy. Instead, it takes a contemporary self-focused approach to learning and applying acting skills. Through doing so, the book is the first to validate a self-curated approach to actor training. Designed as a companion to practical experience and useful as a reference sourcebook, it takes the position that each individual actor must find their own process. Skills for theatre, screen, and voice recorded media are all embraced through practical tasks with signposts to essential reading and specific resources. Designed equally for the untrained actor as a companion and an aide-memoire for the professionally trained actor, this book sheds light on the practical skills required and how to access, practise, and accomplish them. **Reading Writing**

**Right** Jeremy Punt, Marius J Nel, 2018-10-18. In a collection of essays, former students, colleagues, and friends of Prof. Elna Mouton honour her life, career, and scholarly contributions upon her retirement from Stellenbosch University. The various essays interact with Prof. Mouton's concern for biblical hermeneutics, ethics, and the interactions and connections between the two, ultimately illustrating the width and variety of interest that her work stimulated and which it interacted with.

With this come other pertinent questions: how do you decide what to wear? how do you find costumes and props that are within your budget and many others. This volume in the *Glee Club* series answers these questions and more. Readers will be well on their way to forming their own glee club with this fun and engaging guide to all things glee club. Language Arts in Asia Christina DeCoursey, 2012-01-17. This volume is the first of a series contributing to the academic study of Language Arts as an English language teaching paradigm. Language Arts has been widely used in native English-speaking countries including Australia and New Zealand. Its recent adoption into the second language teaching curriculum in Hong Kong, as well as similar initiatives within secondary and tertiary education in mainland China, enhances its interest to scholars studying second language teaching and learning in Asian contexts. This book offers many papers and discussions of interest to teachers, language professionals, scholars, and administrators. Its chapters explore current topics in Language Arts research, including trends in the rapprochement of stylistics and linguistics, teaching approaches, and learning outcomes. At the same time, they offer diverse theoretical and methodological approaches of interest to the practitioner and policy maker, as well as the researcher. The value of this volume lies particularly in strengthening the theoretical and methodological foundations of Language Arts. The use of literature and the arts in humanist education has a long history within Europe, being traditionally appreciated for its ability to transform leaders, instill finer sensibilities, and question social ills. In its postcolonial incarnations,

as the traditional subject areas were informed by critical and linguistic theories language arts subject areas were less often used as they were understood to offer opportunities to analyse their functions as apology for leaders coopting the young and pacifying dissent but less often used to teach second language skills Language Arts curricula arising since the 1980s have increasingly embraced authentic voices styles and genres Contemporary Language Arts curricula use literature to teach reading based and communication skills in conjunction with critical and creative thinking The movement of English language education beyond native English shores has placed Language Arts into a World Englishes frame and therefore its curricula have included the teaching ethics civics and intercultural sensitivity The explosion of media and digital communications of the 1990s led to the adoption of media literacy as a crucial Language Arts skill As digital innovations continue to impact the teaching of English Language Arts has adopted multiliteracies These developments are represented in the papers included in this volume

**Scenographic Design Drawing** Sue Field, 2020-12-14 This enlightening study explores the set design drawings for theatre and live performance highlighting their unique qualities within the greater arena of drawing practice and theory The latest volume in the Drawing In series Scenographic Design Drawing encourages an interdisciplinary dialogue in the field of drawing with the inclusion of illustrations throughout Scenographic design drawings visualize the images in the designer's mind's eye early in the design process They are the initial design tool in the creative engagement with theatre opera dance and non text based performance It is in particular this body of drawings that is unique as both a performative and a theatrical representation of multiple worlds within the stage space Sue Field illuminates this illustration process and identifies how these drawings have functioned and developed over time Scenographic Design Drawing serves to satisfy an emerging global curiosity and a thirst for new knowledge and understanding in relation to the drawings executed by the historical and contemporary scenographer This work addresses a critical research gap and shows how the scenographic design drawing continues to be a principal site of innovation subjectivity originality and authorship in theatre and live performance

Engaging Spaces Erik Kristiansen, Olav Harsløf, 2015-11-23 All performances whether music theater visual arts or even street protests or games have this in common they happen somewhere within a space This anthology explores the complicated relationship between performance and the space in which it is hosted Examining both well known spaces such as concert halls or stages as well as unconventional ones such as the street the contributors investigate different conceptions of space how space is experienced how different spaces are unique from one another and ultimately the ways space enables the performing arts to deeply engage audiences
