 the concrete as well as masonry structures Corrosion is one major factor that causes reinforced concrete structures to
 deteriorate over time However the degrading process is not evenly distributed throughout the structure The damage can be
 detected timely and the structure s degradation model can be updated with the help of proper monitoring and inspection
 techniques The damages in the masonry structures may happen due to moisture ingress cracking mortar failure settlement
 and spalling etc Structure health monitoring SHM may assist in understanding the structures deterioration mechanisms and
 reducing the ongoing deterioration in a scientific manner A complete detail of both the traditional and cutting edge
 approaches used in the SHM process is described in this book The latest non destructive techniques and semi destructive
 techniques shall also be discussed in this book This book aids academics and industry professionals with recent developments
 in SHM techniques Additionally it encourages researchers in coming up with creation of newer applications in structural
