Hot Hadronic Matter Jean Letessier, Hans H. Gutbrod, Johann Rafelski, 2012-12-06 The past decade has seen the development of the operational understanding of fundamental interactions within the standard model This has detoured our attention from the great enigmas posed by the dynamics and collective behavior of strongly interacting particles Discovered more than 30 years ago the thermal nature of the hadronic particle spectra has stimulated considerable theoretical effort which so far has failed to confirm on the basis of microscopic interactions the origins of this phenomenon However a highly successful Statistical Bootstrap Model was developed by Rolf Hagedorn at CERN about 30 years ago which has led us to consider the boiling hadronic matter as a transient state in the transformation of hadronic particles into their melted form which we call Quark Gluon Plasma QGP Today we return to seek detailed understanding of the thermalization processes of hadronic matter equipped on the theoretical side with the knowledge of the fundamental strong interaction theory the quantum chromodynamics QCD and recognizing the important role of the complex QCD vacuum structure On the other side we have developed new experimental tools in the form of nuclear relativistic beams which allow to create rather extended regions in space time of Hot Hadronic Matter The confluence of these new and recent developments in theory and experiment led us to gather together from June 27 to July 1 1994 at the Grand Hotel in Divonne les Bains France to discuss and expose the open questions and issues in our field

Physicianship and the Rebirth of Medical Education J. Donald Boudreau,Eric Cassell,Abraham Fuks,2018-02-26 The renewal of medical curricula generally arises from emerging pedagogies e g problem based learning new technologies e g high fidelity simulation or prevailing sociocultural forces e g complexity of health care delivery and team based care Approximately 15 years ago a team of physicians and administrators sought to take this further by considering the very nature of medical practice and the patient physician relationship that is the context and conduit of caring and care they restructured the composition and function of medical education This book Physicianship and the Rebirth of Medical Education is the authoritative publication on the philosophy design and implementation of this new curriculum From first year to graduation this book reimagine the education of medical students in its entire scope It discusses the epistemology of clinical practice and pedagogical methods and addresses pragmatic issues of curricular implementation The educational blueprint presented in the book rests on a new definition of sickness one focused on impairments of function as the primary issue of concern for both patients and their care

givers This perspective avoids the common shift of medical attention from persons to diseases and thus provides the basis for an authentic and robust patient centered mindset The title of the book refers to a rebirth This implies that there was a previous birth Indeed the critical ingredients of medical education were articulated historically and many features emanate from a time honored apprenticeship model This book recognizes in William Osler and his natural method of teaching the subject of medicine the foundational elements for teaching physicianship The practice of medicine is indelibly relational and in turn medical education is an intellectual and an emotional journey that is rooted in clinical relationships As this book shows medicine must unfold in the context of patient care patients not diseases should be the center of attention
