

Speciation Quiz

1. In order for speciation to occur, which of the following must be true?
 - a. There must be a barrier to gene flow between populations.
 - b. a population must be dispersed to an island.
 - c. The original population must become polyploid.
 - d. There must be some genetic variability in the population.
 - e. Answers A and D are correct.
 - f. Answers A and B are correct.
2. Within the past 2 million years in Lake Malawi, over 400 species of fish have descended from a single common ancestral species. Some of these species may have developed when fluctuating water levels isolated small sub-populations of the original ancestral species and prevented interbreeding. This is an example of what type of speciation?
 - a. allopatric
 - b. sympatric
 - c. parapatric
 - d. polypatric
3. The many species of finches that now inhabit the Galapagos Islands descended from one or a few species that reached the islands from the main land. After reaching the islands, speciation occurred rapidly to fill the many ecological niches that existed on the previously uninhabited islands. What term best describes this rapid speciation?
 - a. adaptive radiation
 - b. parapatric speciation
 - c. sympatric speciation
 - d. dispersal
4. Which of the following "species" cannot be tested via the biological species concept to see if all the individual organisms are in fact a single species?
 - a. yeast purchased at the grocery store
 - b. a dinosaur species
 - c. different populations of the same bird species
 - d. the so-called "races" of humans
 - e. different genetic strains of the same presumed fungus species
5. Which of these definitions of species most closely fit the biological species concept?
 - a. Members of the same species are all morphological species.
 - b. Members of the same species are all genetically identical.
 - c. Members of the same species look almost exactly alike.
 - d. For asexually reproducing organisms, members of the same species are whatever an expert says they are.
 - e. Members of the same species can mate and produce fertile offspring. Members of different species can't.
6. The Kaibab squirrel lives on the north side of the the Grand Canyon and the Abert squirrel lives on the south side. Even though these two species are only miles apart, their gene pools are kept isolated by their inability to cross the Grand Canyon. If these two species are derived from the same ancestral species, what mechanism probably accounts for their development into two separate species?
 - a. Allopatric speciation
 - b. Sympatric speciation
 - c. Gamete incompatibility
 - d. Hybrid infertility

know when taking the exam Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II Chemistry Subject Test

When Should I Start Studying It is never too early to start studying for the SAT II Chemistry test The earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material The sooner you learn the format of the exam the more comfortable you will be when you take the exam

FORMAT OF THE SAT II CHEMISTRY The SAT II Chemistry is a one hour exam consisting of 85 multiple choice questions The first part of the exam consists of classification questions This question type presents a list of statements or questions that you must match up with a group of choices lettered A through E Each choice may be used once more than once or not at all The exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet You will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first The last section is composed strictly of multiple choice questions with choices lettered A through E

Material Tested The following chart summarizes the distribution of topics covered on the SAT II Chemistry Subject Test

Topic	Percentage	Number of Questions
Atomic	however do not review too much at any one time	
Concentrate on one problem area at a time by reviewing the questions and explanations and by studying our review until you are confident you completely understand the material		
Keep track of your scores By doing so you will be able to gauge your progress and discover general weaknesses in particular sections You should carefully study the reviews that cover your areas of difficulty as this will build your skills in those areas		

TEST TAKING TIPS Although you may be unfamiliar with standardized tests such as the SAT II Chemistry Subject Test there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties Become comfortable with the format of the exam When you are practicing to take the SAT II Chemistry Subject Test simulate the conditions under which you will be taking the actual test Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual exam with much more confidence Know the directions and format for each section of the test Familiarizing yourself with the directions and format of the exam will not only save you time but will also ensure that you are familiar enough with the SAT II Chemistry Subject Test to avoid nervousness and the mistakes caused by being nervous Do your scratchwork in the margins of the test booklet You will not be given scrap paper during the exam and you may not perform scratchwork on your answer sheet Space is provided in your test booklet to do any necessary work or draw diagrams If you are unsure of an answer guess However if you do guess guess wisely Use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible By eliminating three answer choices you give yourself a fifty fifty chance of answering correctly since there will only be two choices left from which to make your guess Mark your answers in the appropriate spaces on the answer sheet Fill in the oval that corresponds to your answer darkly completely and neatly You can change your answer but

remember to completely erase your old answer Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly When you have finished working on a section you may want to go back and check to make sure your answers correspond to the correct questions Marking one answer in the wrong space will throw off the rest of your test whether it is graded by machine or by hand You don't have to answer every question You are not penalized if you do not answer every question The only penalty results from answering a question incorrectly Try to use the guessing strategy but if you are truly stumped by a question remember that you do not have to answer it Work quickly and steadily You have a limited amount of time to work on each section so you need to work quickly and steadily Avoid focusing on one problem for too long Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test On the night before the test gather together the materials you will need the next day Your admission ticket Two forms of identification e.g. driver's license student identification card or current alien registration card Two No 2 pencils with erasers Directions to the test center A watch if you wish but not one that makes noise as it may disturb other test takers On the day of the test you should wake up early after a good night's rest and have breakfast Dress comfortably so that you are not distracted by being too hot or too cold while taking the test Also plan to arrive at the test center early This will allow you to collect your thoughts and relax before the test and will also spare you the stress of being late If you arrive after the test begins you will not be admitted to the test center and you will not receive a refund During the Test When you arrive at the test center try to find a seat where you feel most comfortable Follow all the rules and instructions given by the test supervisor If you do not you risk being dismissed from the test and having your scores canceled Once all the test materials are passed out the test instructor will give you directions for filling out your answer sheet Fill this sheet out carefully since this information will appear on your score report After the Test When you have completed the SAT II Chemistry Subject Test you may hand in your test materials and leave Then go home and relax When Will I Receive My Score Report and What Will It Look Like You should receive your score report about five weeks after you take the test This report will include your scores percentile ranks and interpretive information
