**A Neolithic and Bronze Age Landscape in Northamptonshire** Jan Harding, Frances Healy, 2013-01-15 The Raunds Area Project investigated more than 20 Neolithic and Bronze Age monuments in the Nene Valley From c 5000 BC to the early 1st millennium cal BC a succession of ritual mounds and burial mounds were built as settlement along the valley sides increased and woodland was cleared Starting as a regular stopping place for flint knapping and domestic tasks first the Long Mound and then Long Barrow the north part of the Turf Mound and the Avenue were built in the 5th millennium BC With the addition of the Long Enclosure the Causewayed Ring Ditch and the Southern Enclosure there was a chain of five or six diverse monuments stretched along the river bank by c 3000 cal BC Later a timber platform the Riverside Structure was built and the focus of ceremonial activity shifted to the Cotton Henge two concentric ditches on the occupied valley side From c 2200 cal BC monument building accelerated and included the Segmented Ditch Circle and at least 20 round barrows almost all containing burials at first inhumations then cremations down to c 1000 cal BC by which time two overlapping systems of paddocks and droveways had been laid out Finally the terrace began to be settled when these had gone out of use in the early 1st millennium cal BC This second volume of the Raunds Area Project published as a CD comprises the detailed reports on the environmental archaeology artefact studies geophysics and chronology

**Medical Statistics And Computer Experiments (With Cd-rom)** Ji-qian Fang, 2005-08-17 This textbook consists of three parts basic concepts of statistics advanced statistical methods and design and analysis for medical research Each chapter begins with challenging medical problems and related statistical methods and theories to make the statistical ideas more easily understood there is a section of computer experiments in each chapter where some basic statistical phenomena and related concepts are revealed The statistical software SAS is used to carry out related statistical calculations The aim of this book is to make medical students and researchers grasp easily the most useful tools of statistics for their medical research It is done through various applications to a great number of medical problems interesting demonstration of well designed computer experiments and detailed explanation of statistical thinking

**Time and Frequency: Theory and Fundamentals** Byron Emerson Blair, 1974 The document is a tutorial Monograph describing various aspects of time and frequency T F Included are chapters relating to elemental concepts of precise time and frequency basic principles of quartz

oscillators and atomic frequency standards historical review recent progress and current status of atomic frequency standards promising areas for developing future primary frequency standards relevance of frequency standards to other areas of metrology including a unified standard concept statistics of T F data analysis coupled with the theory and construction of the NBS atomic time scale an overview of T F dissemination techniques and the standards of T F in the USA The Monograph addresses both the specialist in the field as well as those desiring basic information about time and frequency The authors trace the development and scope of T F technology its improvement over periods of decades its status today and its possible use applications and development in days to come Fishery Bulletin ,2011 *Natural Time Analysis: The New View of Time* Panayiotis Varotsos,Nicholas V. Sarlis,Efthimios S. Skordas,2011-08-14 This book deals with the theory and the applications of a new time domain termed natural time domain that has been forwarded by the authors almost a decade ago P A Varotsos N V Sarlis and E S Skordas Practica of Athens Academy 76 294 321 2001 Physical Review E 66 011902 2002 In particular it has been found that novel dynamical features hidden behind time series in complex systems can emerge upon analyzing them in this new time domain which conforms to the desire to reduce uncertainty and extract signal information as much as possible The analysis in natural time enables the study of the dynamical evolution of a complex system and identifies when the system enters a critical stage Hence natural time plays a key role in predicting impending catastrophic events in general Relevant examples of data analysis in this new time domain have been published during the last decade in a large variety of fields e g Earth Sciences Biology and Physics The book explains in detail a series of such examples including the identification of the sudden cardiac death risk in Cardiology the recognition of electric signals that precede earthquakes the determination of the time of an impending major mainshock in Seismology and the analysis of the avalanches of the penetration of magnetic flux into thin films of type II superconductors in Condensed Matter Physics In general this book is concerned with the time series analysis of signals emitted from complex systems by means of the new time domain and provides advanced students and research workers in diverse fields with a sound grounding in the fundamentals of current research work on detecting long range correlations in complex time series Furthermore the modern techniques of Statistical Physics in time series analysis for example Hurst analysis the detrended fluctuation analysis the wavelet transform etc are presented along with their advantages when natural time domain is employed *Water-resources Investigations Report* ,1995 **Bulletin** ,1916 Bulletin of the United States Geological Survey Geological Survey (U.S.),1916 Ad Hoc Networks Shiwen Mao,Scott Midkiff,Hua Zhu,2010-02-17 Ad hoc networks refer to the wireless networking paradigm that covers a variety of network forms for specific purposes such as mobile ad hoc networks sensor networks vehicular networks underwater networks underground networks personal area networks and home networks The various forms of ad hoc networks promise a broad scope of applications in civilian commercial and military areas which have led to significant new research problems and challenges and have attracted great efforts from academia industry and

government This unique networking paradigm necessitates re-examination of many established wireless networking concepts and protocols and calls for developing new fundamental understanding of problems such as interference mobility connectivity capacity and security among others While it is essential to advance theoretical research on fundamentals and practical research on efficient algorithms and protocols it is also critical to develop useful applications experimental prototypes and real world deployments to achieve a practical impact on our society for the success of this networking paradigm The annual International Conference on Ad Hoc Networks AdHocNets is a new event that aims at providing a forum to bring together researchers from academia as well as practitioners from industry and government to meet and exchange ideas and recent research work on all aspects of ad hoc networks As the first edition of this event AdHocNets 2009 was successfully held in Niagara Falls Ontario Canada during September 22-25 2009

**Design and Analysis of Ecological Experiments** Samuel M. Scheiner, Jessica Gurevitch, 2001-04-26 Ecological research and the way that ecologists use statistics continues to change rapidly This second edition of the best-selling *Design and Analysis of Ecological Experiments* leads these trends with an update of this now standard reference book with a discussion of the latest developments in experimental ecology and statistical practice The goal of this volume is to encourage the correct use of some of the more well-known statistical techniques and to make some of the less well-known but potentially very useful techniques available Chapters from the first edition have been substantially revised and new chapters have been added Readers are introduced to statistical techniques that may be unfamiliar to many ecologists including power analysis logistic regression randomization tests and empirical Bayesian analysis In addition a strong foundation is laid in more established statistical techniques in ecology including exploratory data analysis spatial statistics path analysis and meta-analysis Each technique is presented in the context of resolving an ecological issue Anyone from graduate students to established research ecologists will find a great deal of new practical and useful information in this current edition

**NBS Monograph**, 1974 **Manual of Instructions for the Survey of the Mineral Lands of the United States** United States. General Land Office, 1909 *American Environmentalism* J. Michael Martinez, 2013-06-20 Protecting the natural environment and promoting sustainability have become important objectives but achieving such goals presents myriad challenges for even the most committed environmentalist *American Environmentalism: Philosophy, History, and Public Policy* examines whether competing interests can be reconciled while developing consistent coherent effective public policy to regulate uses and protection of the natural environment without destroying the national economy It then reviews a range of possible solutions The book delves into key normative concepts that undergird American perspectives on nature by providing an overview of philosophical concepts found in the western intellectual tradition the presuppositions inherent in neoclassical economics and anthropocentric human-centered and biocentric earth-centered positions on sustainability It traces the evolution of attitudes about nature from the time of the Ancient Greeks through Europeans in the Middle Ages and the Renaissance the Enlightenment and the American

Founders the nineteenth and twentieth centuries and up to the present Building on this foundation the author examines the political landscape as non governmental organizations NGOs industry leaders and government officials struggle to balance industrial development with environmental concerns Outrageous claims silly misrepresentations bogus arguments absurd contentions and overblown prophesies of impending calamities are bandied about by many parties on all sides of the debate industry spokespeople elected representatives unelected regulators concerned citizens and environmental NGOs alike In lieu of descending into this morass the author circumvents the silliness to explore the crucial issues through a more focused disciplined approach Rather than engage in acrimonious debate over minutiae as so often occurs in the context of green claims he recasts the issue in a way that provides a cohesive look at all sides This effort may be quixotic but how else to cut the Gordian knot

**Blockchain and the Supply Chain** Nick Vyas, Aljosja Beije, Bhaskar Krishnamachari, 2022-09-03 Blockchain is a transformative driver for change in all industries Learn from the latest research and case studies how this technology can and will be used to revolutionize supply chain management Blockchain and the Supply Chain provides a complete overview of blockchain and the key benefits of integrating this technology into the supply chain This textbook explains how track and trace can be improved transaction efficiency increased visibility enhanced and more through blockchain With extensive case studies learning is underpinned by practical insights as well as cutting edge research Clear and accessible information is provided to students on how blockchain will affect supply chain processes metrics and performance and how to capitalize on the potential of this technology The fully revised new edition includes the latest information on Enterprise Blockchain Ethereum and Hyperledger Focus is also placed on the application of Cloud Internet of Things IoT Machine learning ML and other technologies that support supply chains and their integration with blockchain This textbook highlights how to use blockchain as an enabler and key driver for solutions in the end to end supply chain

Power Supply, Energy Management and Catenary Problems Eduardo Pilo, 2010 In latter years energy efficiency has become a crucial concern for every transportation mode but it is in electrified railways where energy savings have shown a bigger potential due to i regenerative braking that allows converting kinetic energy into electric power and ii vehicle interconnection that allows other trains to use regenerated power Power supply and energy management will continue to develop in the future This book gathers under a single cover several papers published in the Computer on Railways series IX X and XI and focuses on power supply and energy management Some of the discussed themes are modelling simulation and optimisation of AC and DC infrastructure analysis of rolling stock consumption and innovative approaches in power supply operation This book will be invaluable to management consultants engineers planners designers manufacturers operators and IT specialists who need to keep abreast of the latest developments in the field *First European Simulation Congress ESC 83* W. Ameling, 2012-12-06 Welcome to Aachen and to the First European Simulation Congress ESC83 a triennial international conference jointly promoted by ASIM GI DBSS SIMS and UKSC ESC83 is organized by ASIM GI supported by

SCS and IMACS and sponsored by NGI section for simulation It takes place at the Karman Auditorium of the Aachen Technical University FRG The aim of ESC83 is to cover all aspects of modeling and simulation in theory and practice to promote the exchange of knowledge and experience between different international research groups in this field and to strengthen the international contact between developers and users of modeling and simulation techniques On the occasion of the Congress people of scientific and engineering disciplines will meet to discuss the state of the art and future activities and developments A large number of contributed papers has been strictly examined and selected by the Scientific Committee to guarantee a high international standard The book contains the accepted papers that will be presented at the Congress The papers have been classified according to the following keywords
