

Findings about Fee Structures

- Fee structures for MBUF/RUC *could* be intentionally complex
 - Example: rates could differ by fuel type, weight, road, ..
 - Higher rates for privacy-protecting systems (no location)
 - But existing data flows on highway use might not be sufficient to predict total fees collected (vs. gas tax rate)
- We gathered vehicle-level data from Pennsylvania for more than 10 years to assess how a MBUF might work..

Ho, Ozden Ochoa, Mehdi Hojjati, 2011-06-28 **Structural Unemployment** Wolfgang Franz, 2012-12-06 High and persistent unemployment rates in Europe during the eighties gave rise to a lively discussion about the nature and causes of joblessness. Among other sources, structural unemployment was blamed for the lack of response of unemployment to increasing aggregate demand. Renewed attention was thus devoted to an analysis of the magnitude and the development of

structural unemployment as well to its possible determinants In this literature the Beveridge curve experienced a resurrection and at first glance it seemed to be an appropriate tool to analyse the aforementioned issues However it was soon recognized that the Beveridge curve i e the relation between unemployment and vacancies was anything but stable thus requiring a careful distinction between dynamic loops around a stable long run Beveridge curve and possible shifts due to say an increasing mismatch between labor supplied and demanded The controversy is far from being settled at the time of this writing This book contains a collection of hitherto unpublished papers which are devoted to a theoretical and econometric analysis of structural unemployment The papers put considerable emphasis on the question to what extent the Beveridge curve can serve as an adequate tool for such studies The countries under consideration are Germany and Austria In what follows a very brief summary of each paper will be outlined Franz and Siebeck present at some length a theoretical and econometric analysis of the Beveridge curve in Germany
