

6 Connecting the Signal Booster

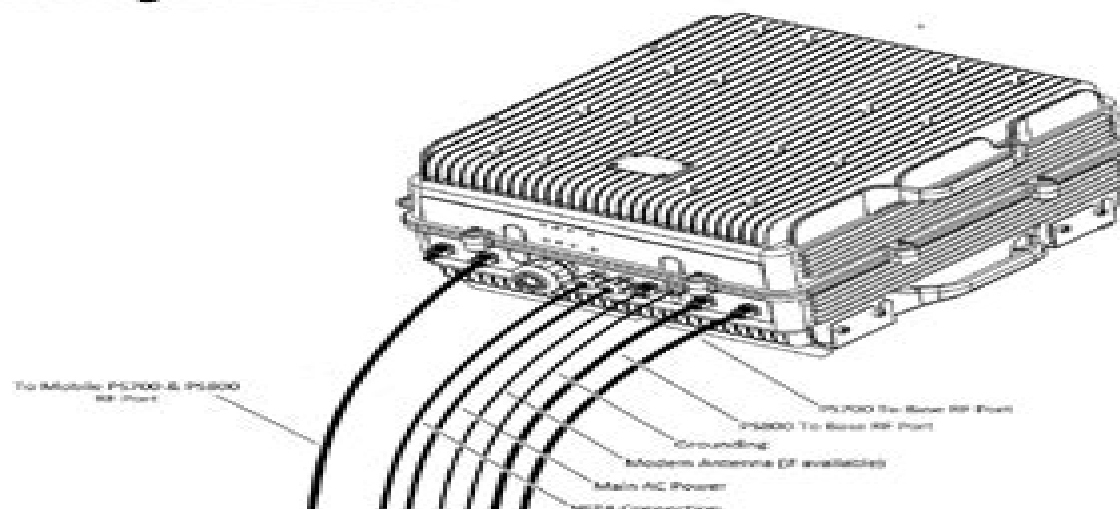

Figure: *RF ports and Power Cable Glands location*

6.1 Connection step by step

A. RF Ports: Connect the service antennas to the To Mobile Port and each PS700 and PS800 donor antennas to the To Base RF Ports. N type female connectors are used in this Signal Booster.

B. Once the RF ports of the Signal Booster are properly loaded connect the Main AC power. If using the AC model, electrical installation must provide differential and thermo-magnetic breaker elements according to electric safety international regulations.

C. Make sure that not used cable glands are properly sealed. For this, use the seal plug and self-amalgamating tape.

D. Auxiliary DC connection can be provided to the device from an external DC source. There is a dedicated port for this purpose, and a dedicated DC connector labelled "VDC IN" located inside the cabinet. Please check appropriate DC voltage at Signal Booster specification sheet.

User Manual Westell 61
