Development Tony Chiu Ming Lam, Kathy Ellen Green, 2023-05-26 Survey Development A Theory Driven Mixed Methods Approach provides both an overview of standard methods and tools for developing and validating surveys and a conceptual basis for survey development that advocates establishing and testing of hypotheses pertaining to presumptions and score interpretation and use inferences and mixing quantitative and qualitative methods The book has 14 chapters which are divided into four parts Part A includes six chapters that deal with theory and methodology Part B has five chapters and it gets into the process of constructing the survey using both quantitative and qualitative methods Part C comprises two chapters devoted to assessing the quality or psychometric properties reliability and validity of survey responses Finally the one chapter in Part D is an attempt to present a synopsis of what was covered in the previous chapters in regard to developing a survey with the TDMM framework for developing survey and conducting survey research This provides a full process for survey development intended to yield results that can support valid interpretation and use of scores Including detailed online resources this book is suitable for graduate students who use or are responsible for interpretation of survey research and survey data as well as survey methodologists and practitioners who use surveys in their field **Assessing Spirituality in**

a Diverse World Amy L. Ai, Paul Wink, Raymond F. Paloutzian, Kevin A. Harris, 2020-12-07 This volume addresses an important problem in social scientific research on global religions and spirituality How to evaluate the role of diverse religious and spiritual R S beliefs and practices within the rapid evolution of spiritual globalization and diversification trends The book examines this question by bringing together a panel of international scholars including psychologists sociologists and researchers in religious studies public health medicine and social work The content includes chapters describing innovative concepts of post Christian spirituality Eastern forms of meditation afterlife beliefs associated with the three dominant cultural legacies various non religious worldviews spiritual Jihad and secular and religious reverence The book also covers such important themes as spiritual well being faith struggle meaning making modeling and support as well as mysticism and using prayer to cope with existential crises This book advances the understanding of the role of R S across different faiths and cultural systems including both Western and non Western ones and enriches the mainstream of psychological sciences and practices It appeals to students educators researchers and clinicians in multiple related fields and disciplines **Hallucinations: New Interventions Supporting People with Distressing Voices and/or Visions** Simon McCarthy-Jones,, Mark Hayward, Flavie Waters, Iris E. Sommer, 2016-12-04 Hallucinations can occur across the five sensory

modalities auditory visual olfactory tactile and gustatory Whilst they have the potential to be benign or even highly valued they can often be devastating experiences associated with distress impaired social and occupational functioning self harm and suicide Those who experience hallucinations in this latter manner may do so within the context of a wide range of psychiatric diagnoses including schizophrenia bipolar disorder borderline personality disorder and post traumatic stress disorder The only routinely available interventions for people distressed by hallucinations are antipsychotic drugs which date from the introduction of chlorpromazine in the 1950s and manualized cognitive behavioral therapy which originated in the 1990s These interventions do not help all people distressed by hallucinations and in the case of antipsychotic medication come with notable side effects There has hence been great interest in new interventions to support people distressed by hallucinations The goal of this Frontiers Research Topic is to present a collection of papers on new developments in clinical interventions for those distressed by hallucinations In the psychiatric condition that remains most strongly associated with hallucinations schizophrenia the majority 70% of people will have experienced hallucinations in the auditory modality approximately a third will have experienced visual hallucinations and a smaller minority will have experienced hallucinations in other modalities Consistent with this prevalence this collection focusses on auditory and visual hallucinations This is not to minimise the potential distress that can occur from hallucinations in other modalities For example tactile hallucinations particularly when stemming from earlier experiences of sexual abuse can be highly distressing and improved ways to help sufferers of such experiences are also needed In summary this collection aims to result in an interdisciplinary collection of papers which will appeal to a wide readership spanning all with an interest in this area
