Using Open Innovation To Identify The Best Ideas Journal Article:

The Agility Advantage Amanda Setili, 2014-09-22 How to win market leadership in a fast changing world In the past companies could pick a strategy and stick with it maintaining a competitive edge for years But today companies surge ahead fall behind or even disappear in mere months If you and your company are going to thrive for the long run you need to continuously evolve change and stay a step ahead of your competition The ability to see and capitalize on new opportunities is the cornerstone of agility Successful technology based firms like Google Tesla and Amazon have all mastered agility within their core business practices but companies in any sector can and must learn to spot new opportunities and make the right choices about what to invest in what to change and what to abandon The Agility Advantage first shows how to identify those aspects of your business where agility is most crucial where the business environment is changing fast and which elements have the greatest impact on the customer's decision to buy Amanda Setili then shows how to master the three components of agility Market agility Gain ideas from your most demanding and forward thinking customers and from outside your industry Engage observe and mix with customers to identify the opportunities created by their changing demands Decision agility Anticipate the changes that may affect you and turn even troubling trends into opportunities Design your strategy to maximize learning and to manage risk Generate diverse alternatives and make fast fact based decisions about which to pursue Execution agility Build new capabilities shed what doesn't fit and take the first steps in a new direction Experiment then reinforce and build on what works Enlist and inspire your organization around a compelling purpose and grant employees the autonomy and resources to continuously adapt and adjust course The future will present more opportunities but narrower windows to capture them With a wealth of valuable information and practical strategies *The Agility Advantage* is essential reading to help any organization adapt and thrive both today and tomorrow **ECIE2015-10th European**

Open Innovation and Business Success Monika Gawarzynska,2010-02 Innovation is a crucial topic in the study of economics business technology sociology and engineering The questions asked in research nowadays focus not on it why innovation is important but how to innovate and how innovation processes can be managed Furthermore the discussion on innovation is about how to maintain strong economic growth in an era that is increasingly being defined by the globalisation of competition major financial and demographic challenges Recently the economy continues to upset the market and recession tempts to cut back on the investments in research and development in the organizations But even now in spite of crisis and its impacts on the economy seems to be the perfect time to increase firms innovation efforts The increasing competition processes and the development of Web 2 0 technologies soon Web 3 0 are challenging the business to build more interactive relationship between the real time market participants The companies must nowadays find out how to achieve a competitive advantage for future This paper presents the concept of Open Innovation which can help public and private institutions achieve better performance or business success and at last win the competition with market rivals

House of Commons - Business, Innovation and Skills

Committee: Open Access - HC 99-I Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee, 2013-09-10 The Government's commitment to increasing access to published research findings and its desire to achieve full open access are welcomed in this report from the Business Innovation and Skills Committee. However, whilst Gold open access, where authors publish their articles in an open access journal that provides free immediate open access to all of its articles on the publisher's website, is a desirable ultimate goal, focusing on it during the transition to a fully open access world is a mistake. The Government and Research Council UK should reconsider their preference for Gold open access during the five year transition period and give due regard to the evidence of the vital role that Green open access and repositories have to play as the UK moves towards full open access. Authors opting for Green open access publish in any subscription journal and then make their peer reviewed final draft freely accessible online by self archiving or depositing the article in a repository, either institutional or disciplinary, upon acceptance for publication. Other recommendations include promotion of standardisation and compliance across subject and institutional repositories, mitigation against the impact on universities of paying Article Processing Charges out of their own reserves, introduce a reduced VAT rate for e journals, non disclosure clauses should not be used in publishing contracts that include the use of public funds. BIS must review its consultation processes to ensure that lessons are learned from the lack of involvement of businesses, particularly SMEs, in the formation of open access policy.
