 our agricultural landscapes is no longer just a technical scientific or even political problem but it has evolved into a socially
 complex so called wicked problem of conflicting social governance and economics This creates an extreme economic obstacle
 where the value of ecosystem services remains low and diffuse and the transactions costs remain high and multiple Using
 Uber like business platform technology and a shared governance model a symbiotic demand for environmental benefits is
 created Enabling multi sector transactions for environmental benefits this platform innovation would remedy the tragedy of
 the commons the economic nemesis to achieving landscape sustainability In a nutshell to sustain our agricultural landscapes

a transdisciplinary approach supported by a shared governance model housed within a multi sided platform in needed This book introduces an assessment framework identifying governance actors styles and ratios for socio ecological systems The assessment uses a new governance compass to identify the types of actors completing which tasks and identifies the styles of governance used to complete the tasks It is aimed to anyone involved in sustainability science agricultural policy planning or integrated landscape design **Scientific and Technical Aerospace Reports** ,1988 *Catalog of Copyright Entries.
