Vaal Undergraduate Application Forms 2016:

Nanohybrid Materials for Water Purification Sarat K. Swain, 2022-08-12 This book comprehensively reviews the key topics in the area of nanocomposites and hybrid materials used for waste water treatment and purification. It covers materials chemistry, various synthesis approaches, and properties of these nanomaterials for the different water purification techniques. It provides new direction to the readers to better understand the chemistry behind these materials and the methods to improve their properties. This book will be a very valuable reference source for graduates and postgraduates, engineers, research scholars, primarily in the field of material science, water nanoscience, and nanotechnology, material scientists, researchers in the water-related area, scientists working in water treatment plants, and pollution mitigation industries.

Redefining Education and Development Kaitano Dube, 2024-10-18 The book aligns with the United Nations Sustainable Development Goals (SDGs), particularly Goal 4, which focuses on quality education. It explores the evolving role of education as a critical driver for achieving all 17 SDGs by providing a platform for discussing innovative educational models and theories that foster sustainable development. The book takes an interdisciplinary approach, merging educational theory, developmental practice, and human psychology to address complex global challenges hindering sustainable development. The book includes case studies and empirical research, such as exploring student entrepreneurship in the agricultural sector and the factors bridging the gap between entrepreneurial intention and venture creation. These examples provide readers with practical applications of theoretical concepts and demonstrate the real-world impact of educational innovations, which is at the core of education delivery for all and how education touches on other areas of the SDGs. The book offers valuable insights for policymakers, educators, and development practitioners by presenting research and theory-based analyses. It suggests ways to improve the academic environment to foster entrepreneurship and innovation, which are key to economic development and job creation, especially in regions with high youth unemployment rates. The content suggests educational reforms that are responsive to the changing societal and economic landscapes. The book's blend of theory and practice targets a broad audience, including academic scholars, students, development agencies, non-governmental organisations, and policymakers. It seeks to engage these diverse readers in a conversation about the future of education and its role in achieving sustainable development. In summary, the book seeks to provide a comprehensive exploration of the nexus between education, development, and human needs in the context of the SDGs, offering innovative perspectives and practical solutions to equip readers to contribute to sustainable global development.

Paper-based Diagnostics Kevin J. Land, 2018-12-11 This book explores the status of paper-based diagnostic solutions or Microfluidics 2.0. The contributors explore how paper-based tests can be widely distributed and utilized by semi-skilled personnel, how close to commercial applications the technology has become, and what is still required to make paper-based diagnostics the game changer it can be. The technology is examined through the lens of the World Health Organization's ASSURED criteria for low-resource countries: Affordable

Sensitive Specific User friendly Rapid and robust Equipment free and Deliverable to end users Its applications have to include health technology environmental technology food safety and more This book is appropriate for researchers in these areas as well as those interested in microfluidics and includes chapters dedicated to principles such as theory of flow and surface treatments components such as biomarkers and detection and current methods of manufacturing Discusses how paper based diagnostics can be used in developing countries by comparing current diagnostic tests with the World Health Organization s ASSURED criteria Examines how paper based diagnostics could be integrated with other technologies such as printed electronics and the Internet of Things Outlines how semi skilled personnel across a variety of fields can implement paper based diagnostics

Life in Transit: Theological and Ethical Contributions on Migration Manitza Kotzé, Riaan Rheeder, 2020-12-31 Migration is an issue that is under discussion worldwide and affects South Africa the United States of America and Germany in a distinctive way This book reflects academically on this significant and topical subject of migration from the often neglected perspective of the fields of theology and Christian ethics While the majority of contributions are from the South African context there are also chapters reflecting on the topic from the other two aforementioned contexts While numerous publications have recently appeared on the subject reflection from theology and Christian ethics are often lacking As such this scholarly publication wants to add ethical value to the local and global conversations on the theme from a theological perspective The book reflects on migration from the perspectives originated in the disciplines of biblical studies the Hebrew Bible and the New Testament systematic theology ecumenical studies Christian ethics practical theology and missiology It presents new and innovative inquiries primarily from a qualitative methodological viewpoint The book unveils new themes for deliberation and provides novel interpretations and insights into existing research

Additive Manufacturing: Materials, Processes, Quantifications and Applications Jing Zhang, Yeon-Gil Jung, 2018-05-17 Additive Manufacturing Materials Processes Quantifications and Applications is designed to explain the engineering aspects and physical principles of available AM technologies and their most relevant applications It begins with a review of the recent developments in this technology and then progresses to a discussion of the criteria needed to successfully select an AM technology for the embodiment of a particular design discussing material compatibility interfaces issues and strength requirements The book concludes with a review of the applications in various industries including bio energy aerospace and electronics This book will be a must read for those interested in a practical comprehensive introduction to additive manufacturing an area with tremendous potential for producing high value complex individually customized parts As 3D printing technology advances both in hardware and software together with reduced materials cost and complexity of creating 3D printed items these applications are quickly expanding into the mass market Includes a discussion of the historical development and physical principles of current AM technologies Exposes readers to the engineering principles for evaluating and quantifying AM technologies Explores the uses of Additive Manufacturing in various industries most notably aerospace

medical energy and electronics **River Basin Management** José Simão Antunes Do Carmo, 2021-04-21 This book addresses recent advances in the field of river systems Chapters cover a wide range of topics including artificialization of rivers and banks technical aspects of flood and sediment dynamics physical processes and institutional vulnerabilities watershed management and collaborative governance water quality analysis and protection measures acquisition and measurement of data statistical and econometric procedures adaptation and restoration measures rehabilitation and sustainability of riparian ecosystems and strategies to improve the ecological functions of riparian areas All chapters contribute relevant information and useful content for scientists and other readers interested or concerned about the lack of adequate management actions and implementation of appropriate measures and protections or their ineffectiveness in containing vulnerabilities and ecological sustainability of river systems **Deanship in the Global South** Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration **The Statesman's Yearbook 2024** Palgrave Macmillan, 2024-01-03 Now in its 160th edition The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions *Corrupted* Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict *Corrupted* takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of

the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Wind Turbine Aerodynamics Wen Zhong Shen, 2019-10-04 Wind turbine aerodynamics is one of the central subjects of wind turbine technology To reduce the levelized cost of energy LCOE the size of a single wind turbine has been increased to 12 MW at present with further increases expected in the near future Big wind turbines and their associated wind farms have many advantages but also challenges The typical effects are mainly related to the increase in Reynolds number and blade

flexibility This Special Issue is a collection of 21 important research works addressing the aerodynamic challenges appearing in such developments The 21 research papers cover a wide range of problems related to wind turbine aerodynamics which includes atmospheric turbulent flow modeling wind turbine flow modeling wind turbine design wind turbine control wind farm flow modeling in complex terrain wind turbine noise modeling vertical axis wind turbine and offshore wind energy Readers from all over the globe are expected to greatly benefit from this Special Issue collection regarding their own work and the goal of enabling the technological development of new environmentally friendly and cost effective wind energy systems in order to reach the target of 100% energy use from renewable sources worldwide by 2050

The human dilemma of displacement Alfred R. Brunsdon, 2020-12-31 In this book social responsive theological research converges to provide practical theological and ecclesiological perspectives on the growing human dilemma of displacement The book presents the research of practical theologians a missiologist and a religious practitioner whose work pertains first and foremost to the South African context The different fields of expertise of the contributors within the broader field of practical theology worked towards a unique compilation of themes each relevant to the issue at stake The majority of chapters are theoretically orientated except where authors refer to empirical work conducted during previous research The main contribution of this collaborative work is to be sought in the practical theological and ecclesiological perspectives it provides It engages the critical questions of what kind of church we need and what kind of care we should provide in the face of the growing predicament of human displacement The theological and theoretical principles uncovered in the different chapters will be of use to theologians from all theological subdisciplines as well as to religious practitioners and leaders of faith communities that are challenged with the growing realities of strangers on their doorsteps and in their pews
