

## VCADS Pro overview

### Main menu

The Test, Calibration, Programming and Job card programs are started from the Main menu. In addition, a number of administrative settings can be made, such as the language setting.

For further information see "Main Menu, VCADS Pro" page 18.

### Test

The VCADS Pro Test program contains tests that can be performed on vehicles using both the Multiplex electrical system and conventional electrical systems.

The tests are made up of standard components, e.g. display of sensor values or graphs that show how a signal varies with time.

An identification dialogue is displayed when VCADS Pro Test is started. The dialogue lists the user, electrical system and model so that only tests for the relevant model are displayed. When the dialogue has been completed the Test menu is shown from where all the tests are started.

For further information see "Test and Calibration, VCADS Pro" page 23.
