## Dichotomous Keys

Classification is the science of dividing organisms into groups and sub-groups based on how they are related. A tool called a dichotomous key is an organized list of characteristics that can be used to identify organisms. The identified organisms can then be placed into their correct classifications. *Ascomycete Fungi of North America* Michael Beug,Alan E. Bessette,Arleen R. Bessette,2014-03-01 Approximately 75 percent of all fungi that have been described to date belong to the phylum Ascomycota They are usually referred to as Ascomycetes and are commonly found and collected by mushroom enthusiasts Ascomycetes exhibit a remarkable range of biodiversity are beautiful and visually complex and some including morels and truffles are highly prized for their edibility Many play significant roles in plant ecology because of the mycorrhizal associations that they form Thus it is remarkable that no book dedicated to describing and illustrating the North American Ascomycetes has been published in over sixty years Filling the gap between technical publications and the limited representation of Ascomycetes in general mushroom field guides *Ascomycete Fungi of North America* is a scientifically accurate work dedicated to this significant group of fungi Because it is impossible to describe and illustrate the tens of thousands of species that occur in North America the authors focus on species found in the continental United States and Canada that are large enough to be readily

noticeable to mycologists naturalists photographers and mushroom hunters They provide 843 color photographs and more than 600 described species many of which are illustrated in color for the first time While emphasizing macroscopic field identification characteristics for a general audience the authors also include microscopic and other advanced information useful to students and professional mycologists In addition a color key to the species described in this book offers a visual guide to assist in the identification process *Tests that Second Language Teachers Make and Use* Greta
