The Responsive University and the Crisis in South Africa, 2021-05-31 Around the world higher education is faced with a fundamental question what is the basis for our claim of societal legitimacy In this book the authors go beyond the classical response regarding teaching research and community engagement Instead the editor puts forward the proposition that the answer lies in responsiveness the extent to which universities respond or fail to respond to societal challenges Moreover because of its intractable legacy issues and crisis of inequality the question regarding the societal legitimacy of universities is particularly

clearly manifested in South Africa one of the most unequal countries in the world The Responsive University brings together contributions on the issue of responsiveness from a number of international university leaders half of them specifically addressing the South African situation within the context of the international situation as presented by the other authors In the global discussion about the role of universities in society this book provides a conceptual framework for a way forward

Reflections of South African University Leaders: 1981 to 2014 Council on Higher Education, 2016-03-17 Much has been written about the ever growing demands on university leadership worldwide in the face of increasingly complex changes and challenges from within the academy and beyond However as we are reminded by Johan Muller in the Introduction to this book there are particular features of time and place that also throw up unique problems It is precisely time and place that make this set of reflections by university leaders quite remarkable and distinguishes it from the many biographies to be found in the literature on higher education leadership In the main this collection spans two decades the 1990s and 2000s of unprecedented levels of change in South African higher education Leaders in universities as well as those responsible for higher education policy in the government and associated statutory bodies had no neat script to work off nor manuals or prescripts of good leadership or practice Instead there was palpable excitement about collectively imagining and nurturing a new post apartheid higher education system which would contribute to the social and economic development needs of the country the deepening of democracy and which would also be globally relevant Most reflections touch on the coalface of leadership which is the face to face interactional dimension dealing with staff with students with council chairs What comes through clearly is the importance of what are sometimes called people skills In these accounts this is not simply presented as a human relations aptitude for a number of reasons first of which is the special nature of universities and their occupants More than one points out the special challenge of managing the talented people that are academics and their inbuilt distaste for bureaucracy their reluctance to be managed or told what to do The message here is consistently one of needing to be completely open with academics the importance of maintaining the distinction between collegial and executive management avoiding managerialism and the critical importance of winning and holding their trust The inspiration for this collection arose in late 2013 in the Council on Higher Education's CHE Monitoring and Evaluation Directorate the directorate responsible for conducting research on the higher education landscape and monitoring the state of the sector They noted that conditions besetting universities had grown increasingly complex both globally but more especially locally and the question arose how had this altered the challenges to university leadership over the period between the new political dispensation and the second decade of the new millennium More particularly how had leaders with a proven track record of visionary and strong leadership during this period faced these challenges How did they see the main changes that needed dealing with What challenges did these changes pose and how were they successfully overcome What did they think looking back were the main constituents of successful leadership and management What wisdom could be distilled for posterity The Directorate decided

to invite a range of vice chancellors and senior academic leaders who had completed their terms of office to contribute to a project that set out to gather such reflections and compile them into a publication **Handbook of Research on Software for Gifted and Talented School Activities in K-12 Classrooms** Ikuta, Shigeru, 2019-12-27 As technology continues to play a pivotal role in society education is a field that has become heavily influenced by these advancements New learning methods are rapidly emerging and being implemented into classrooms across the world using software that is low cost and easy to handle These tools are crucial in creating skillful learning techniques in classrooms yet there is a lack of information and research on the subject The Handbook of Research on Software for Gifted and Talented School Activities in K 12 Classrooms is an essential reference source that discusses newly developed but easy to handle and less costly software and tools and their implementation in real 21st century classrooms worldwide The book also helps and supports teachers to conduct gifted and talented school activities in K 12 classrooms Featuring research on topics such as educational philosophy and skillful learning techniques this book is ideally designed for software developers educators researchers psychologists instructional designers curriculum developers principals academicians and students seeking coverage on the emerging role that newly developed software plays in early education
