V 55 Diesel Engine:

Centurion vs T-55 Simon Dunstan, 2022-09-08 A tightly focused illustrated study comparing the design development and combat performance of two of the Cold War's first main battle tanks. Conceived at the height of World War II, the British Centurion and the Soviet T-55 were initially expected to counter the formidable Panther and Tiger tanks of Germany. But as the Cold War unfolded, these machines prepared instead for the coming struggle between NATO and the Warsaw Pact. Though they never fought in Europe, these two tanks became the mainstay of the Cold War's proxy forces around the world. From Korea to the Middle East and on to Angola, these two armored combatants clashed repeatedly, reaching their crescendo on the Golan Heights during the Yom Kippur War where 177 Centurions of the IDF took on a vastly superior Arab force. Presented with highly detailed digital artwork and photographs, this is a tightly focused study of the development and operational history of two of the Cold War's first main battle tanks. *Index of Technical Manuals, Technical Regulations, Technical Bulletins, Supply Bulletins, Lubrications Orders, and Modification Work Orders* United States. Persian Gulf War Encyclopedia Spencer C. Tucker, 2014-08-20 Ideal for high school and college level readers as well as students attending military academies and general audiences, this encyclopedia covers the details of the Persian Gulf War as well as the long-term consequences and historical lessons learned from this important 20th-century conflict. This encyclopedia provides a rich historical account of the Persian Gulf War, examining the conflict from a holistic perspective that addresses the details of the military operations as well as the social, political, economic, and cultural aspects of the war. The alphabetically arranged entries chart the events of the war, provide cross-references, and sources for additional study and identify the most important individuals and groups associated with the conflict. In addition, it includes primary source documents that will provide readers with valuable insights and foster their critical thinking and historical reasoning skills. The Persian Gulf War served as the first live combat test of much of the United States' then new high-tech weaponry. The war also held many lessons about the play of national interests, the process of coalition building, the need for effective communication and coordination, and the role of individuals in shaping history. This book addresses all key battles, the nations involved, strategies employed by both sides, weapon systems used, the role of the media, the role played by women, and environmental and medical issues associated with the conflict.

best known tank of the Cold War and it was produced in greater numbers than any other tank in history. It first went into service just after the Second World War and over 70 000 were made and its design was so successful that it even outlasted its successor the T 62. For a generation it formed the backbone of the armored forces of the Warsaw Pact and it was exported all over the world, remaining in the front line until the 1990s. This photographic history in the Images of War series by Anthony Tucker Jones is the ideal introduction to it. In over 150 archive photographs and a detailed analytical text he traces the design and development of the T 54 55 and records its operational history. He describes how it was conceived as a main battle tank, an all rounder contrasting with the light, medium and heavy tanks produced in the past, and it proved to be extraordinarily effective. It was as adaptable as it was long lasting, different versions being produced by China, Czechoslovakia, Poland and Romania. Its relatively simple design also meant it was easy to maintain even in difficult conditions and it was used by armies across the Third World, in particular in wars in Angola, Ethiopia, Mozambique and Somalia. Anthony Tucker Jones's history of this remarkable armored vehicle will be absorbing reading for tank enthusiasts and a valuable source for modelers.
