Business Analytics: Progress On Applications In Asia Pacific Jorge L C Sanz,2016-09-29 Technological advances in the last five years have allowed organizations to use Business Analytics to provide insights increase understanding and it is hoped gain the elusive competitive edge The rapid development of Business Analytics is impacting all enterprise competences profoundly and classical business professions are being redefined by a much deeper interplay between business and information systems As computing capabilities for analysis has moved outside the IT glass house and into the sphere of individual workers they are no longer the exclusive domain of IT professionals but rather accessible to all employees Complex open source data analytics

packages and client level visualization tools deployed in desktops and laptops equip virtually any end user with the instruments to carry out significant analytical tasks. All the while the drive to improve customer experience has heightened the demand for data involving customers providers and entire ecosystems. In response to the proliferation of Business Analytics a new Center and Masters of Science Program was introduced at the National University of Singapore NUS. The Center collaborates with over 40 different external partner organizations in Asia Pacific with which all MSBA students undertake individual projects. Business Analytics Progress on Applications in Asia Pacific provides a useful picture of the maturity of the Business Analytics domain in Asia Pacific. For more information about the Business Analytics Center at NUS visit the website at msba.nus.edu.

Optimality-theoretic Syntax, Semantics, and Pragmatics Géraldine Legendre, Michael T. Putnam, Henriëtte de Swart, Erin Zaroukian, 2016. This book investigates the morphosyntactic semantic and pragmatic properties of language and the interactions between them from the perspective of Optimality Theory. It integrates optimization processes into the formal and functional study of grammar interpreting optimization as the result of conflicting violable ranked constraints. Unlike previous work on the topic this book also takes into account the question of directionality of grammar. A model of grammar in which optimization processes interact bidirectionally allows both language generation the process of selecting the optimal form of a given meaning and language interpretation the process of optimal interpretation of a given form to be taken into account. Chapters in this volume explore the consequences of both symmetric unidirectional and asymmetric bidirectional versions of Optimality Theory investigating the syntax semantics interface first language acquisition and sequential bilingual grammars. The volume presents cutting edge research in Optimality Theoretic syntax and semantics as well as demonstrating how optimization processes as modelled in this formalism serve as a viable approach for linguists and scholars in related fields.

Corporate Social Responsibility and Discrimination Christina Keinert-Kisin, 2016-04-27. This book presents and deconstructs the existing explanations for the differential career development of qualified men and women. It reframes the problem of discrimination in the workplace as a matter of organizational ethics social responsibility and compliance with existing equal opportunity laws. Sensitive points are identified where social biases decision makers individual economic interests and shortcomings of organizational incentive policies may lead to discrimination against qualified women. The ideas put forward are empirically tested in an original laboratory experiment that examines personnel selection in the male dominated field of science and technology. It contrasts the selection of applicants with gendered and gender blind applications available to subjects under controlled conditions. 30% of participants were high level decision makers which is unprecedented in this field of research. The results highly relevant for organizational practice are explained and discussed in detail.
