Freshwater Challenges of South Africa and its Upper Vaal River Anja du Plessis, 2017-02-07 This book promotes better understanding and awareness of South Africa significant water problems by describing the country's and especially the Upper Vaal River's water resources. It is a go-to book for students, professionals, and regular citizens when information is required regarding the country's and more specifically the Upper Vaal River's freshwater resources. It highlights the major problems and risks which need to be addressed and give a realistic and true representation of the current water affairs.

Microstructural Geochronology Desmond E. Moser, Fernando Corfu, James R. Darling, Steven M. Reddy, Kimberly Tait, 2017-12-26 Microstructural Geochronology Geochronology techniques enable the study of geological evolution and environmental change over time. This volume integrates two aspects of geochronology: one based on classical methods of orientation and spatial patterns and the other on ratios of radioactive isotopes and their decay products. The chapters illustrate how material science techniques are taking this field to the atomic scale, enabling us to image the chemical and structural record of mineral lattice growth and deformation and sometimes the patterns of radioactive parent and daughter atoms themselves to generate a microstructural geochronology from some of the most resilient materials in the solar system. First compilation of research focusing on the crystal structure, material properties, and chemical zoning of the geochronology mineral archive down to nanoscale. Novel comparisons of mineral time archives from different rocky planets and asteroids and their shock metamorphic histories. Fundamentals on how to reconstruct and date radiogenic isotope distributions using atom probe tomography. Microstructural Geochronology will be a valuable resource for graduate students, academics, and researchers in the fields of petrology, geochronology, mineralogy, geochemistry, planetary geology, astrobiology, chemistry, and material science. It will also appeal to philosophers and historians of science from other disciplines.

Farmer's Weekly, 1928 The Rhodesian War Paul L. Moorcraft, Peter McLaughlin, 2016-01-20 A political and military analysis of this conflict in southern Africa with maps, photos, and a new introduction assessing its long aftermath. A half century after the Universal Declaration of Independence, this superb book depicts the military history of Southern Rhodesia from the first resistance to colonial rule through the period of UDI by the Smith government to the Lancaster House agreement that transferred power. There are vivid accounts of the operations against the black nationalist guerrillas by the security forces and the intensity of the fighting and courage of the participants will surprise and enthrall readers. Atrocities were undoubtedly committed by both sides as the protagonists played for very high stakes. But this is more than just a book on military operations. The authors are able to provide expert analysis of the historical situation and examine events well into the twenty-first century, including Mugabe's operations against rival tribes and white farmers. With a new introduction, this is essential reading for those wishing to learn more about a counterinsurgency campaign and why, despite the ingenuity of the Rhodesian military fighting against

overwhelming odds and restricted by sanctions the outcome culminating in the Lancaster House Agreement was inevitable

Is Star Trek Utopia? Sebastian Stoppe, 2022-07-20 Star Trek has transcended science fiction through its use of elements that have crucial roles in classical utopian tradition New technologies change a civilization a miniature society unfolds on a spaceship and an android teaches humanity Star Trek has been answering many questions about our own world for 50 years and since the days of Captain Kirk the franchise has become one of the world's best known cultural phenomena This book documents what the Star Trek franchise has in common with classic utopias Chapters analyze how technology changes society and how the Federation embodies utopian ideals Also explored are the political relations among alien species that reflect past and present conflicts in our real world and how the Borg resembles an anti utopian society

'Africa Forms the Key' Suryakanthie Chetty, 2021-01-04 This book examines the work of prominent South African geologist Alex Du Toit as a means of understanding the debate around continental drift both in segregation era South Africa and internationally It contextualises Du Toit's work within a particularly formative period of South African science from the paleoanthropological discoveries that sparked debates about the origins of humankind to Jan Smuts' own theory of holism Beyond South African scientific discoveries the book sets Du Toit's work against a backdrop of ideological struggles over space both domestically in terms of segregation and nationalism as well as internationally as South Africa sought to assert its position within the Commonwealth These debates were embodied by Du Toit's work on the theory of continental drift which put Africa and South Africa at the centre geologically and geographically The author also focuses on the divisions in geology caused by drift theory tracing the vigorous intellectual debate and dissent indicative of the ideological milieu within which scientific thought is constructed It traces the history of continental drift from its inception in the nineteenth century and later work of Alfred Wegener which was both elaborated upon and substantiated by Du Toit The study further focuses on Du Toit's research on continental drift in South African and South America and the geological fossil and climatological evidence used to bolster this theory

Water Scarcity and Conflict in African River Basins Mahlakeng Khosi Mahlakeng, 2023-03-31 The book presents a

critical and comparative analysis of the hydropolitical landscape of African transboundary river basins which for much of the past century have been affected by water scarcity River and lake basins can become a source of tension and conflict due to a complicated mix of environmental demographic diplomatic historical and geopolitical factors This book however specifically focuses on the important and often under looked role played by scarcity in generating or exacerbating conflicts in shared river basins Asserting that transboundary river basins tie states into a web of interdependence this book raises awareness of how water scarcity or the depletion of water resources complicates this relationship as nations are forced to look beyond their own borders to meet the demand for water to satisfy multiple needs Taking a comparative approach it examines three shared basins the Orange Senqu the Nile and the Niger River basins While situated in different regions all three basins are marked by serious environmental challenges that are detrimental to combustible hydropolitics over such shared water resources and they provide fascinating insights into the links between climate variability and change water resources human security conflict adaptation and regime capacity Overall this book argues that conflict over transboundary resources can be prevented given the establishment of norms rules and the role of external actors that help regulate state behaviour and control their impacts This book will be of great interest to students and scholars of water resource management hydropolitics environmental conflict resource scarcity and international relations It will also be of interest to policymakers involved in transboundary water resource governance

Forms of Empire Nathan K. Hensley, 2016 In this far reaching and provocative study Nathan K Hensley shows how the modern state s anguished relationship to violence pushed literary writers of the Victorian era to expand the capacities of literary form He explores the works of some of the era s most astute thinkers including George Eliot Charles Dickens and Robert Louis Stevenson

The Archaean Geology of the Kaapvaal Craton, Southern Africa Alfred Kröner, Axel Hofmann, 2019-02-20 This book provides a comprehensive overview of the evolution of one of the oldest and best exposed Archaean cratons on this planet There is currently a renewed interest in the early Earth and the Kaapvaal craton has long served as a model for early crustal evolution This unique multidisciplinary resource features information on geology tectonics geochemistry and geochronology It offers a wealth of new data on various aspects of the craton as well as contributions on the various crustal units by international specialists

The Self-Field Chris Abel, 2021-03-15 In this incisive study of the biological and cultural origins of the human self the author challenges readers to re think ideas about the self and consciousness as being exclusive to humans In their place he expounds a metatheoretical approach to the self as a purposeful system of extended cognition common to animal life the invisible medium maintaining mind body and environment as an integrated field of being Supported by recent research in evolutionary and developmental studies together with related discoveries in animal behaviour and the neurosciences the author examines the factors that have shaped the evolution of the animal self across widely different species and times through to the modern technologically enmeshed human self the differences between which he contends are relations of degree rather than absolute differences We

are he concludes instinctive and fuzzy individuals clinging to fragile identities in an artificial and volatile world of humanity's own making but which we now struggle to control This book which restores the self to its fundamental place in identity formation will be of great interest for students and academics in the fields of social developmental and environmental psychology together with readers from other disciplines in the humanities especially philosophy cultural theory and architecture

Biodiversity Litigation Guillaume Futhazar, Sandrine Maljean-Dubois, Jona Razzaque, 2023 This book promotes the concept of Biodiversity Litigation as a common notion of environmental law and investigates litigation in a variety of countries and from various perspectives It opens the space for more creative legal thinking when dealing with and analysing biodiversity related disputes

Acid Mine Drainage in South Africa Suvania Naidoo, 2016-10-13 This SpringerBrief focuses on Acid Mine Drainage AMD in the three basins in the Witwatersrand South Africa It provides a background to AMD and its impacts from a social science perspective The South African government and non governmental organizations response to AMD is assessed as well the socio economic and developmental effects of AMD This volume which is based on the author's Master's dissertation at UNISA involves interviews with a range of experts in the field from government departments environmental organisations activists the private sector mining tourism sector and the agricultural sector The book discusses existing policy documents on AMD and provides recommendations in response to the many socio economic impacts which have not been fully addressed A literature review on the global context of AMD is provided South Africa's water systems are already severely harmed by climate change different forms of pollution and poorly managed sanitation systems For these reasons the country is becoming increasingly water stressed and therefore water will continue to become much scarcer in the future As a result of AMD's continued impact on South Africa's water systems as a technical or scientific matter as well as the policy implications for the mining sector water security and socio economic sustainability has become a highly contested issue

Sociology in South Africa R. Sooryamoorthy, 2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology Providing a holistic picture of the subject both as it is taught in universities and as a field of research it reveals the trajectories of a discipline in a challenging socio political context With the support of historical and scientometric data it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature direction and foci of sociological research in the country The author shows how during the apartheid era sociology was professionally fragmented and divided along language and race lines It was however able to flourish with the advent of democracy in 1994 and has become a unique academic movement This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa

Routledge Handbook of Food as a Commons Jose Luis Vivero-Pol, Tomaso Ferrando, Olivier De Schutter, Ugo Mattei, 2018-12-17 From the scientific and industrial revolution to the present day food an essential element of life has been progressively transformed into a private transnational mono dimensional commodity of

mass consumption for a global market But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective Chapters do not define the notion of commons but engage with different schools of thought the economic approach based on rivalry and excludability the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South the legal approach that describes three types of proprietary regimes private public and collective and different layers of entitlement bundles of rights and the radical activist approach that considers the commons as the most subversive coherent and history rooted alternative to the dominant neoliberal narrative These schools have different and rather diverging epistemologies vocabularies ideological stances and policy proposals to deal with the construction of food systems their governance the distributive implications and the socio ecological impact on Nature and Society The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings
