    Plato and Hesiod G. R. Boys-Stones,J. H. Haubold,2009-12-10 It hardly needs repeating that Plato defined philosophy partly by contrast with the work of the poets What is extraordinary is how little systematic exploration there has been of his relationship with specific poets other than Homer This neglect extends even to Hesiod though Hesiod is of central importance for the didactic tradition quite generally and is a major source of imagery at crucial moments of Plato s thought This volume which presents fifteen articles by specialists on the area will be the first ever book length study dedicated to the subject It covers a wide variety of thematic angles brings new and sometimes surprising light to a large range of Platonic dialogues and represents a major contribution to the study of the reception of archaic poetry in Athens **Connectivity, the Answer to Ending Ignorance and Separation** Judy Breck,2004 This book contains parallel discussions of how network connectivity is fundamentally diminishing terrorism transforming business enterprises becoming a new artistic expressive medium and providing a new and different locus for human knowledge Connectivity the Answer to Ending Ignorance and Separation is written for every educator eager to learn more about networks BOOK JACKET **The History of Utopian Thought** Joyce Oramel Hertzler,2019-11-21 This book originally published in 1923 embodies two related and yet distinct types of sociological endeavour It is a study in the history of social thought a field which had only been receiving serious and widespread attention in recent years and attempts to give an historical cross section of representative Utopian thought at the time But it is also a study in social idealism a study in the origin selection and potency of those social ideas and ideals that occasional and usually exceptional men conceive with particular emphasis upon their relation to social progress It was the first book that attempted to give an unprejudiced systematic treatment of the social Utopias as a whole *UGC NET library Science unit 8 book with 400 question answer (theory+mcq) as per updated syllabus* DIWAKAR EUDCATION HUB,2023-02-02 UGC NET library Science unit 8 book with 400 question answer theory mcq as per updated syllabus

IFIP and hence we describe it as the Third IFIP Conference on the History of Computing and Education or simply History of Computing and Education 3 HCE3 This volume consists of a collection of articles presented at the HCE3 conference held in association with the IFIP 2008 World Computer Congress in Milano Italy Articles range from a wide variety of computing perspectives and they represent activities from six continents The HCE3 conference is an event of the IFIP Working Group 9 7 on the History of Computing a working group of IFIP s Technical Committee 9 TC9 on the Relationship between Computers and Society In addition it is in cooperation with the IFIP Technical Committee 3 TC3 on Education The HCE3 conference brings to light a broad spectrum of issues It illustrates topics in computing as they occurred in the early days of computing whose ramifications or overtones remain with us today Indeed many of the early challenges remain part of our educational tapestry most likely many will evolve into future challenges Therefore these proceedings provide additional value to the reader as it will reflect in part the future development of computing and education to stimulate new ideas and models in educational development **Learning LangChain** Mayo Oshin,Nuno Campos,2025-02-13 If you re looking to build production ready AI applications that can reason and retrieve external data for context awareness you ll need to master LangChain a popular development framework and platform for building running and managing agentic applications LangChain is used by several leading companies including Zapier Replit Databricks and many more This guide is an indispensable resource for developers who understand Python or JavaScript but are beginners eager to harness the power of AI Authors Mayo Oshin and Nuno Campos demystify the use of LangChain through practical insights and in depth tutorials Starting with basic concepts this book shows you step by step how to build a production ready AI agent that uses your data Harness the power of retrieval augmented generation RAG to enhance the accuracy of LLMs using external up to date data Develop and deploy AI applications that interact intelligently and contextually with users Make use of the powerful agent architecture with LangGraph Integrate and manage third party APIs and tools to extend the functionality of your AI applications Monitor test and evaluate your AI applications to improve performance Understand the foundations of LLM app development and how they can be used with LangChain *The Dream of Reason: A History of Philosophy from the Greeks to the Renaissance* Anthony Gottlieb,2010-10-25 His book supplant s all others even the immensely successful History of Western Philosophy by Bertrand Russell A C Grayling Already a classic in its first year of publication this landmark study of Western thought takes a fresh look at the writings of the great thinkers of classic philosophy and questions many pieces of conventional wisdom The book invites comparison with Bertrand Russell s monumental History of Western Philosophy but Gottlieb s book is less idiosyncratic and based on more recent scholarship Colin McGinn Los Angeles Times A New York Times Notable Book a Los Angeles Times Best Book and a Times Literary Supplement Best Book of 2001 *Imagined Truths* Bryant Griffith,2012-01-01 Education is often envisioned as a linear one way cause and effect process with teaching as the cause learning as the effect But the relationships are less tidy less passive and more cyclical than that There is a continuous

cycle of inquiry discovery and integration leading to further inquiry Technology facilitates the exchange of information not just teacher to student but student to teacher and student to student The result is that the nature of the development of learning knowledge and even wisdom becomes more transparent This presents challenges of method and identity for the teacher but more importantly it enforces a sense among students of their critical investment in their own education Teachers and learners need to contemplate why and how they construct knowledge An essential part of this reflection is questioning the premises that govern our views of the world as well as the premises of what is presented as knowledge This demands a new epistemology and requires that teachers change their conceptual structures and recognize that all theories of knowledge are not founded solely on formal logic using uninterpreted experience as data Moreover it demands that new models be considered as ways of making sense and of understanding As teachers we realize that learning how to cope with changes of this magnitude requires leadership where relationships are crucial The rapidly emerging significance of social networks is reshaping our world a world that isn t flat but where spiky concentrations of people work together to make things happen creatively It is more the case that the education we need to provide is to solve problems we can t conceive Our cultural narratives when freed of the bounds of instrumental learning become powerful tools for an emerging world where questions and answers are not simple cause and effect equations Yes the teacher is a facilitator but one with the mastery of sufficient material to be able topaint numerous contexts for the learner We need to be open attentive and anticipatory to that which may surprise us to that which we will not expect The shape of past knowledge can be discovered by reflecting on the ways in which we make decisions and by asking why questions These questions frame intentions and focus on the specific process of knowing why and how ideas have changed from the past to the present By placing the self in the middle this process becomes a trialectic of relational thought which in turns becomes the dialectic of learning   The Definitive Answer to the Meaning of Life Jack Abaza,2023-11-16 This haunting question in all of its variations and interpretations has echoed through the annals of time Since the dawn of philosophy the world s intellectual titans have grappled valiantly with this enigma and many of them dedicated entire lifetimes to unearthing answers in religion aesthetics love personal convictions and myriad other realms but to no avail How has this ineluctable conundrum come to signify everything and nothing To term it the Holy Grail of philosophy is almost to insultingly undersell its gravitas the meaning of life remains maddeningly elusive mocking our most desperate curiosities Despite over 2 500 years of introspection debate and countless theories its mysterious prize remains unclaimed However this tome is no mere philosophical expedition for it is a revolution in the making it manifests a rebellion against the two thousand year old foundations of speculation and dares to shatter the orthodoxy By venturing into the forbidden realm of a science philosophers long denied as relevant and converging the scientific method with peerless reasoning the sort that would stupefy the most weathered thinkers this most eminent opus heralds philosophy s renaissance no longer as a quaint forgotten relic of bygone eras but as a vanguard discipline poised for reawakening   **Ian McEwan:**

Sex, Death, and History Eluned Summers-Bremmer,2014-05-28 Ian McEwan s works have always shown an interest in the question of how fiction operates This interest does not usually manifest on the formal level A few of the early stories aside his fictions are not formally experimental McEwan tends to opt for those reliable patternings of space time and narrative progression that enable readers to trust the authorial environment sufficiently to identify with characters and become invested to some extent in what happens to them Despite McEwan s commitment by and large to naturalistic means of telling a story his later novels also demonstrate a concern with opacity as characters often pursue courses of action for reasons that are unclear to them Equally often these actions bear some relation to the intrinsic opacity or enigma of one s sexual desires one s relation to one s mortality or one s relation to the actions of those human beings who have gone before one as this book will show It is this focus on enigma in McEwan s work whether sexual mortal or historical that lends it to a psychoanalytic reading such as the kind pursued in this book because for psychoanalysis there is no such thing as full access to one s self or to one s feelings or motivations Given that one s relation to history is also opaque in the sense that one grasps fully or imagines one grasps fully only those historical events which predate or otherwise excludes one this study seeks historical reasons for why McEwan sometimes blocks readerly identification with characters in the early fiction For these characters are also products of their environments environments which the characters relative opacity and unlikeability seems to offset and exaggerate or present in a manner showcased for one s judgment And in this way the characters environment is denaturalized to say the least This book reveals how all of these works explore to some extent the human tendency to act and feel in particular situations in profound contradistinction to how one might prefer to think one would This failure to coincide with one s image of how one would have expected or preferred to behave The Innocent s Leonard Marnham is not the cool experienced lover of his imaginings any more than Solar s Michael Beard is going to revamp his lifestyle or career produces instances of affective or imaginative excess troubling images or feelings that can often only be allayed or dealt with by a further failure to coincide with one s desires In this book author Eluned Summers Bremner shows that McEwan s interests in opacity not only become clear in significance and import but that his interests in human failure to coincide with one s views about the past and hopes for the future also appear as what they are an ongoing concern with how one relates to the complex operation of human history   *Lectures on the indu* ,1928   **Lectures on the Industrial Revolution of the Eighteenth Century in England** Arnold Toynbee,1908   **Adoption of LMS in Higher Educational Institutions of the Middle East** Rashid A. Khan,Hassan Qudrat-Ullah,2020-07-28 This book discusses the adoption of learning management systems LMS in higher education institutions It presents influential predictors that may impact instructors behavioral intention to adopt learning management systems in the context of Arab culture as well as a unique model of technology acceptance that draws on and combines previous technology adoption models i e a modified unified theory of acceptance and use of technology model UTAUT2 Moreover this study extends the UTAUT2 model by including Hofstede s 1980 cultural dimensions

and technology awareness as the moderators of the model It also describes the explanatory technique approach used to collect quantitative data from the instructors at higher education institutions in Saudi Arabia and were analyzed with structural equation modeling using SPSS Amos software The findings revealed that facilitating conditions were the strongest predictor of behavioral intention to adopt an LMS followed by performance expectancy and hedonic motivation technology awareness and cultural dimensions exerted a moderating influence on instructors behavioral intention to use LMS in their teaching By including new constructs this becomes the first study of its kind exploring instructors use of LMS in Higher Educational Institutions of Saudi Arabia and other countries of the Middle East It offers practical insights for a broad range of researchers and professionals at higher education institutions and serves as a reference guide for designers of learning management systems e g blackboard systems policymakers and the Ministry of Education staff *Plato and the Other Companions of Sokrates* George Grote,2023-12-21 In Plato and the Other Companions of Sokrates George Grote delves into the philosophical milieu of ancient Athens providing a thorough analysis of Plato s dialogues and the influential figures surrounding Socrates With a keen emphasis on the contextual nuances of philosophical thought during the fifth century BCE Grote employs a narrative style that is both scholarly and accessible intertwining historical detail with critical interpretation The text serves not only as a biographical exploration of Socrates circle but also elucidates the evolution of philosophical ideas that shaped Western thought demonstrating how Plato s work was a response to his teacher s life and death George Grote a notable Victorian historian and philosopher was deeply influenced by the intellectual currents of his time particularly the revival of interest in classical philosophy His academic pursuits reflect a profound understanding of both Greco Roman history and the philosophical landscape which undoubtedly informed his writing in Plato and the Other Companions of Sokrates Grote s rigorous approach was instrumental in bridging the gap between ancient texts and contemporary thought making complex ideas comprehensible to modern readers This book is essential for anyone interested in the foundational ideas of Western philosophy and the vibrant intellectual climate of ancient Athens By engaging with Grote s work readers will not only deepen their understanding of Plato and Socrates but also appreciate the rippling effects of their thoughts on the trajectory of philosophical inquiry It is a significant resource for both students and scholars alike **A History of Western Astrology Volume II** Nicholas Campion,2009-04-16 Astrology is a major feature of contemporary popular culture Recent research indicates that 99% of adults in the modern west know their birth sign In the modern west astrology thrives as part of our culture despite being a pre Christian pre scientific world view Medieval and Renaissance Europe marked the high water mark for astrology It was a subject of high theological speculation was used to advise kings and popes and to arrange any activity from the beginning of battles to the most auspicious time to have one s hair cut Nicholas Campion examines the foundation of modern astrology in the medieval and Renaissance worlds Spanning the period between the collapse of classical astrology in the fifth century and the rise of popular astrology on the web in the twentieth Campion challenges the

historical convention that astrology flourished only between the twelfth and seventeenth centuries Concluding with a discussion of astrology s popularity and appeal in the twenty first century Campion asks whether it should be seen as an integral part of modernity or as an element of the post modern world **Arguments for Learning** Bill Cope,Walter Feinberg,2025-03-11 Almost every educational idea worth a thought has been considered at the University of Illinois and anything worth trying has been tested In this history of ideas Bill Cope and Walter Feinberg chronicle the intellectual lives of education thinkers at the university while tracking the development of educational ideas and practices in general Cope and Feinberg draw on conversations narratives and archival research that reveal how different generations explored their role in defining and carrying out the College s multifaceted mission Their account raises critical questions about the character of learning the aims of teaching and the nature of teaching as a profession At the same time the authors address issues that range from the role of schools in fostering individual and collective identity to the introduction of computer mediated and online learning Cope and Feinberg examine changes in self understanding about fundamental ideas and chart how the College evolved from its original narrow mission of training children s schoolteachers to embracing global perspectives A wide ranging portrait of an institution Arguments for Learning uses the School of Education to tell the stories of thinkers dedicated to the idea that education can change the world for the better *World History* ,2000 *Islands, Identity and the Literary Imagination* Elizabeth McMahon,2016-07-09 Australia is the planet s sole island continent This book argues that the uniqueness of this geography has shaped Australian history and culture including its literature Further it shows how the fluctuating definition of the island continent throws new light on the relationship between islands and continents in the mapping of modernity The book links the historical and geographical conditions of islands with their potent role in the imaginary of European colonisation It prises apart the tangled web of geography fantasy desire and writing that has framed the Western understanding of islands their real and material conditions and their symbolic resonance from antiquity into globalised modernity The book also traces how this spatial imaginary has shaped the modern man who is imagined as being the island s natural inhabitant or mirror Importantly the book challenges these habits of thought by their relocation within larger topological and imaginary visions from islanders themsleves *History of the Problems of Philosophy* Paul Janet,Gabriel Séailles,1902
