In *The Age of Entanglement* Louisa Gilder brings to life one of the pivotal debates in twentieth century physics In 1935 Albert
Einstein famously showed that according to the quantum theory separated particles could act as if intimately connected a
phenomenon which he derisively described as spooky action at a distance In that same year Erwin Schr dinger christened
this correlation entanglement Yet its existence was mostly ignored until 1964 when the Irish physicist John Bell
demonstrated just how strange this entanglement really was Drawing on the papers letters and memoirs of the twentieth
century s greatest physicists Gilder both humanizes and dramatizes the story by employing the scientists own words in
imagined face to face dialogues The result is a richly illuminating exploration of one of the most exciting concepts of quantum
physics Government of the City of Rochester, N.Y. General Survey Bureau of Municipal Research (New York, N.Y.),1915
