Project Life Cycle: a group of project phases specified by an organization's project management methodology

Methodology: an organization's specific implementation of project processes; a set of steps to manage a project

Triple Constraint: the concept that scope, time, and cost

are interrelated; one cannot change without affecting at least one of the others; also known as the "Iron Triangle"
CSSE DIAGRAM 24

Baseline (BL): the original plan plus all approved changes (scope, schedule, cost)

Systems: a set of formal management procedures, rules, processes, people, etc. that support an outcome

Historical Information: information from previous projects used to evaluate future project decisions

Lessons Learned: documented variances (historical information) used to avoid variances in current and future projects

PROJECT ROLES

Project Manager: the person ultimately responsible for the project; authorized to spend budget and assign resources to realize project goals

Project Coordinator: a role weaker than a project manager; may assign project resources but not authorized to spend funds

Project Expeditor: a role weaker than a project coordinator; reports on project progress without authority to assign resources or spend funds

Project Sponsor: responsible for funding the project; typically a senior manager; may or may not be the customer

Senior Management: a role higher in organization than the project manager; prioritizes projects, authorizes PM, resolve organization conflicts and issues

Stakeholder: a person or group having an interest, whether positive or negative, in the result of the project

Functional Manager: a department manager who "owns" project resources; administers human resource management responsibilities for employees

Project Officer: a supporting or controlling department regarding methodologies, tools, standards, best practices, and audits

Program Manager: responsible for programs, coordinating several related projects to achieve a common goal

ORGANIZATION TYPES & PROJECT MANAGER POWER

Functional: team members work for a department; may be loaned to a project at times; little or no PM power

Projectized: PM is manager of projects and resources; has complete authority

Matrix: Combination with functional managers and project managers; PM has more power in Strong Matrix, equal in Balanced Matrix, and less in Weak Matrix

PROCESS FRAMEWORK

Process groups are not project phases. Process groups are not linear; they are iterative. Process names follow verb-noun structure (e.g., Define Scope).
