Corpus Linguistics Geoffrey Sampson, Diana McCarthy, 2005-10-01 *Corpus Linguistics* seeks to provide a comprehensive sampling of real life usage in a given language and to use these empirical data to test language hypotheses Modern corpus linguistics began fifty years ago but the subject has seen explosive growth since the early 1990s These days corpora are being used to advance virtually every aspect of language study from computer processing techniques such as machine translation to literary stylistics social aspects of language use and improved language teaching methods Because corpus linguistics has grown fast from small beginnings newcomers to the field often find it hard to get their bearings Important papers can be difficult to track down This volume reprints forty two articles on corpus linguistics by an international selection of authors which comprehensively illustrate the directions in which the subject is developing It includes articles that are already recognized as classics and others which deserve to become so supplemented with editorial introductions relating the individual contributions to the field as a whole This collection of readings will be useful to students of corpus linguistics at both undergraduate and postgraduate level as well as academics researching this fascinating area of linguistics

Using Large Corpora Armstrong-Warwick Armstrong, 1994 *Using Large Corpora* identifies new data oriented methods for organizing and analyzing large corpora and describes the potential results that the use of large corpora offers Today large corpora consisting of hundreds of millions or even billions of words along with new empirical and statistical methods for organizing and analyzing these data promise new insights into the use of language Already the data extracted from these large corpora reveal that language use is more flexible and complex than most rule based systems have tried to account for providing a basis for progress in the performance of Natural Language Processing systems *Using Large Corpora* identifies

these new data oriented methods and describes the potential results that the use of large corpora offers The research described shows that the new methods may offer solutions to key issues of acquisition automatically identifying and coding information coverage accounting for all of the phenomena in a given domain robustness accommodating real data that may be corrupt or not accounted for in the model and extensibility applying the model and data to a new domain text or problem There are chapters on lexical issues issues in syntax and translation topics as well discussions of the statistics based vs rule based debate ACL MIT Series in Natural Language Processing
