

# Algebra assignment sample

## Algebra Tiles

Algebra tiles provide a way to model constant, linear, and quadratic expressions. Three types of tiles represent the parts of an expression based on the concept of area. Recall that the area of a rectangle is found by multiplying the length by the width. The basic representations are explained in the table.

Tile Name	Tile Appearance	Tile Representation
1 tile		A small square tile represents the constant value of 1. The length and width of the square are each 1 unit, which yields an area of 1 square unit ( $1 \times 1 = 1$ ).
$x$ tile		A rectangular tile represents the variable $x$ . The length is $x$ units and the width is 1 unit, which yields an area of $x$ square units ( $x \times 1 = x$ ).

**advance praise for università degli studi di udine** - Jun 13 2023

web advance praise for getting started with processing making a computer program used to be as easy as turning it on and typing one or two lines of code to get it to say hello now it takes a 500 page manual and an entire village not anymore this little book by ben and casey gets you computationally drawing lines tri
