Applied Project Management

Mounir A. Ajam, 2015-07-28 Some still think of project management as a domain only applicable to construction engineering or technology projects. However, over the last two or three decades, project management skills have been recognized as essential skills in all domains and positions. Not everyone needs to be a project manager, but most professionals can benefit from project management learning. The Customizable and Adaptable Methodology for Managing Projects (CAM2P) is an approach developed by the author in 2007. This approach has been used on various projects such as events, marketing, business development, engineering, construction, capital intensive projects, launching a business or a new product, among numerous others. This book is a sample and simple project using CAM2P. In this sample case, the author shows the readers how to use the method from idea to closure, step by step, leading to the successful delivery of a BOOK. This e-book is the first in a series of similar books.
