*The Application of the Third Generation of Cognitive-Behavioral Approaches to Parenting* Helena Moreira, Eva S. Potharst, Maria Cristina Canavarro, 2019-12-10 In recent years there has been growing interest in understanding how the third generation of cognitive behavioral approaches particularly mindfulness compassion and acceptance based approaches can contribute to the design of more efficacious parenting interventions and to a better understanding of parenting behaviors and the parent child relationship However the application of third generation cognitive behavioral therapies and concepts to parenting is still in its infancy and further research is needed to explore the potential of these approaches to enhance existing parenting

interventions or to inform the development of new parenting interventions targeting different groups of parents and their children More research is also needed to understand how mindfulness self compassion acceptance and other related psychological processes may influence parenting practices the parent child relationship and the child s socioemotional development With this e book presenting state of the art research articles on third generation cognitive behavioral approaches a new step is taken in 1 exploring relations between parenting related issues and concepts from the third generation cognitive behavioral framework and 2 examining parenting interventions informed by third generation cognitive behavioral therapies The Oxford Handbook of Group and Organizational Learning Linda Argote,John M.

Levine,2020-01-02 Groups and organizations vary dramatically in their ability to learn Some acquire substantial knowledge as a function of experience while others do not In groups learning can occur at the level of the individual member and or the group as a whole In organizations learning can occur at both of these levels as well as that of the wider collective Besides varying in the amount and kind of information they acquire groups and organizations also vary regarding their success in retaining knowledge and transferring it to other units In general groups and organizations that are proficient in acquiring retaining and transferring knowledge are more productive and more enduring than their less able counterparts The goal of this handbook is to bring together cutting edge theoretical and empirical work on group and organizational learning by leading scholars from several disciplines Because many of the same processes influence learning in groups and organizations including both kinds of learning in the same volume has the potential to facilitate the integration of knowledge and the cross fertilization of ideas These benefits are reciprocal in that research at the group level can shed light on how organizations learn whereas research at the organizational level can illuminate how groups learn By clarifying similarities and differences in the processes that underlie learning in groups and organizations the handbook advances understanding of the causes and consequences of learning in collectives of varying size and complexity *Experience Sampling in Mental Health Research*

Osabuohien P. Amienyi,2016-12-05 This book addresses the negative impact of social cleavages on the development of many African countries It proposes new ideas on how the development crisis in Africa may be addressed by conceptualizing the

underlying problem as a communication issue In contrast to the frequent neglect of this key factor this book provides a provocative discussion of how communication strategies can help to promote national integration and social economic and political development It argues that the activities associated with the communication of national integration must be seen as an all encompassing task that transcends official speeches in attempts to persuade a disparate population to cultivate national consciousness Such activities must encompass efforts to persuade leaders to eliminate policies that seek to promote spatial dislocation and cross cultural interaction and to arouse the audience to pay closer attention to integrative messages disseminated through the mass media     *British Education Index* ,1978     *International Books in Print* ,1991
