*Social Network Based Big Data Analysis and Applications* Mehmet Kaya, Jalal Kawash, Suheil Khoury, Min-Yuh Day, 2018-05-10 This book is a timely collection of chapters that present the state of the art within the analysis and application of big data Working within the broader context of big data this text focuses on the hot topics of social network modelling and analysis such as online dating recommendations hiring practices and subscription type prediction in mobile phone services Manuscripts are expanded versions of the best papers presented at the IEEE ACM International Conference on Advances in Social Networks Analysis and Mining ASONAM 2016 which was held in August 2016 The papers were among the best featured at the meeting and were then improved and extended substantially Social Network Based Big Data Analysis and Applications will appeal to students and researchers in the field Reforming Civil-Military Relations in New Democracies Aurel Croissant, David Kuehn, 2017-03-20 This book addresses the challenge of reforming defense and military policy making in newly democratized nations By tracing the development of civil military relations in various new democracies from a comparative perspective it links two bodies of scholarship that thus far have remained largely separate the study of emerging or failed civilian control over armed forces on the one hand and work on the roots and causes of military effectiveness to guarantee the protection and security of citizens on the other The empirical and theoretical findings presented here will appeal to scholars of civil military relations democratization and security issues as well as to defense policy makers **Microbial Symbionts and Plant Health: Trends and Applications for Changing Climate** Piyush Mathur, Rupam Kapoor, Swarnendu Roy, 2023-05-02 This book provides a comprehensive understanding of the complex relationship between microbial symbionts and plants in the era of climate change It focuses on the plant microbiome associated with different plant organs like roots leaves stems fruit and seeds and showcases their significant role in the enhancement of crop yield and protection in a sustainable manner Concomitantly acumens to the most emerging trends in plant microbial research that includes rhizosphere engineering and metagenomics are also covered in this title The association of microbial symbionts with the host offers a wide advantage in terms of acclimatization to varied environmental conditions A large number of microbes such as cyanobacteria PGPR endophytes and AMF have been shown to improve plant growth and production under the effect of various abiotic and biotic stresses These microbial symbionts secrete several secondary metabolites signaling molecules and hydrolytic enzymes that play a multifarious role in improving plant growth and yield Moreover the symbionts have been known to regulate the host responses at the molecular level Bioprospecting these microbial symbionts will provide an alternative to the chemical based fertilizers and pave the path for the development of biofertilizers The book is a suitable reading material for undergraduate and postgraduate students researchers and scientists working in the field of agricultural biotechnology microbiology mycology and plant pathology and allied fields of plant and microbial sciences The book in this context attempts to provide an integrative and exhaustive study as well as

research material that would help the scientific community in wide respect

**Environmental Stress Physiology of Plants and Crop Productivity** Tajinder Kaur, Saroj Arora, 2021-05-06 The knowledge of plant responses to various abiotic stresses is crucial to understand their underlying mechanisms as well as the methods to develop new varieties of crops which are better suited to the environment they are grown in Environmental Stress Physiology of Plants and Crop Productivity provides readers a timely update on the knowledge about plant responses to a variety of stresses such as salinity temperature drought oxidative stress and mineral deficiencies Chapters focus on biochemical mechanisms identified in plants crucial to adapting to specific abiotic stressors along with the methods of improving plant tolerance The book also sheds light on plant secondary metabolites such as phenylpropanoids and plant growth regulators in ameliorating the stressful conditions in plants Additional chapters present an overview of applications of genomics proteomics and metabolomics including CRISPR CAS techniques to develop abiotic stress tolerant crops The editors have also provided detailed references for extended reading to support the information in the book Environmental Stress Physiology of Plants and Crop Productivity is an informative reference for scholars and researchers working in the field of botany agriculture crop science and physiology soil science and environmental sciences

**Smart Materials for Waste Water Applications** Ajay Kumar Mishra, 2016-02-10 Smart materials are used to develop more cost effective and high performance water treatment systems as well as instant and continuous ways to monitor water quality Smart materials in water research have been extensively utilized for the treatment remediation and pollution prevention Smart materials can maintain the long term water quality availability and viability of water resource Thus water via smart materials can be reused recycled desalinized and also it can detect the biological and chemical contamination whether the source is from municipal industrial or man made waste The 15 state of the art review chapters contained in this book cover the recent advancements in the area of waste water as well as the prospects about the future research and development of smart materials for the waste water applications in the municipal industrial and manmade waste areas Treatment techniques nanofiltration ultrafiltration reverse osmosis adsorption and nano reactive membranes are also covered in depth The chapters are divided into three groups The first section includes the various carbon nanomaterials such as carbon nanotubes mixed oxides with a focus on use of carbon at nanoscale applied for waste water research The second section focuses on synthetic nanomaterials for pollutants removal The third section highlights the bio polymeric nanomaterials where the authors have used the natural polymers matrices in a composite and nanocomposite material for waste treatment The large number of researchers working in the area will benefit from the fundamental concepts advanced approaches and application of the various smart materials towards waste water treatment that are described in the book It will also provide a platform for the researchers and graduate students to carry out advanced research and understand the building blocks

**Ventilation of Normobaric and Hyperbaric Objects** Ryszard Kłos, 2021-03-22 Considering the increased need to test and develop ventilation both for normobaric and hyperbaric

use in underwater technology industries diving equipment submarines and other underwater facilities mining and other relevant industries this book presents a complete study in the field of normobaric and hyperbaric ventilation It focuses on development and verification of the research based mathematical modeling approach for deterministic modeling of ventilation processes both for objects with semi closed and closed circulation of breathing gas It also proposes validated analytical models of ventilation processes and a new type of carbon dioxide emission simulator that was also developed Features Describes ventilation processes by replacing semi empirical models with more accurate analytical models Includes concepts based on deterministic models cause and effect models Focuses on analytical mathematical model of the ventilation process Covers both the objects with semi closed and closed circulation of breathing gas for hyperbaric and normobaric conditions Summarizes relevant research results and their validation in real conditions and implemented into operational practice This book is aimed at researchers professionals and graduate students in hyperbaric facility processing building ventilation processing life support system design shipbuilding marine engineering and diving submarine safety

*Arbuscular Mycorrhizal Fungi in Sustainable Agriculture: Nutrient and Crop Management* Manoj Parihar,Amitava Rakshit,Alok Adholeya,Yinglong Chen,2024-06-03 This 2 volume book is an up to date overview of current progress in Arbuscular Mycorrhizal Fungal AMF technique development inoculum production and its quality regulations application in agriculture horticulture agroforestry and other ecosystems along with nutrient management for sustainable food production It offers new insight and cutting edge information for novices and experts such as students academicians researchers environmentalists industrialists and other individuals interested in the field of mycorrhiza AMF provides favorable rhizospheric environment to the plant with numerous direct and indirect mechanisms in exchange of soil nutrients and photosynthetically fixed carbon Other than the species composition and diversity determination of natural ecosystem AMF play a vital role in maintaining the soil quality agricultural sustainability and environmental integrity The second volume provide comprehensive knowledge on AMF role in nutrient cycling nutrient exchange and their acquisition under normal and stress condition **Impact and Management of Marine Biofouling** Yigit Kemal Demirel,Eugene Georgiades,Marlene Lejars,Kelli Zargiel Hunsucker,2022-08-04

**Capacity Building for Maritime Security** Christian Bueger,Timothy Edmunds,Robert McCabe,2020-10-09 This book studies recent attempts to restructure maritime security sectors through capacity building It innovates both theoretically and empirically It proposes a new framework for understanding maritime capacity building drawing on work in peacebuilding and security sector reform The framework is then applied across empirical case studies from the Western Indian Ocean WIO region written by scholars from the Global South The WIO region is a paradigmatic case to study maritime security and capacity building in action Countries in the region face the full gamut of maritime security challenges while their indigenous capacities to deal with these are often weak In consequence the region functions as an engine of innovation for maritime capacity building more widely The lessons and best practices from

the region have importance consequences for addressing maritime security across the globe *Tracking marine megafauna for conservation and marine spatial planning* Jorge M. Pereira, Ana M. M.
