**Naval Powers in the Indian Ocean and the Western Pacific** Howard M. Hensel, Amit Gupta, 2018-05-11 A vital component of the interdependent global economy maritime transit routes are nowhere more critical than those traversing the Indian Ocean and the Western Pacific Previously areas of the Indian Ocean and Western Pacific have been viewed as separate and discrete political economic and military regions In recent years however a variety of economic political and military forces have created a new understanding of these maritime expanses as one zone of global interaction This book complements the material presented in its companion volume *Maritime Security in the Indian Ocean and the Western Pacific* by analysing the perceptions interests objectives maritime capabilities and policies of the major maritime powers operating in the Indian Ocean and the Western Pacific In addition the book also assesses the contemporary maritime challenges and opportunities that confront the global community within what is rapidly becoming recognised as an integrated zone of global interaction A valuable study for researchers and policymakers working in the fields of maritime security military security and peace studies conflict resolution and Asian affairs

**Precise Chemical Application Technology for Horticultural Crops** Xiaolan Lv, Andreas Herbst, Jianli Song, Xue Li, 2024-06-03 Plant chemical protection uses professional spraying machines to transport chemicals such as pesticides and herbicides to the target sites for pest disease and weed control in crop production Such practices play a vital role in ensuring the supply of food fruits and vegetables for human beings However traditional plant chemical application methods suffer from excessive pesticide use low utilization rate and high labor intensity due to the backwardness of the existing sprayers the single atomization technology etc In order to boost the progress of modern agriculture plant chemical protection should be oriented toward efficient accurate and intelligent application technologies and equipment Smart chemical application technology and efficient equipment can effectively reduce pesticide usage mitigate the harm of chemicals to the environment and lower labor intensity realizing the sustainable development of disease and pest control of horticultural crops ensuring food safety and maintaining crop yield and quality

**Microbial BioTechnology for Sustainable Agriculture Volume 1** Naveen Kumar Arora, Brahim Bouizgarne, 2022-05-03 This volume explains the recent findings on the mutualistic plant microbe interactions and how they can be utilized for sustainable agriculture practices including land reclamation The book covers mainly plant growth promoting microorganisms PGPMs including both the symbiotic bacteria and fungi and their role in mobilization of nutrients providing protection to the crops from phytopathogens and abiotic stresses PGPMs play important roles in survival

and health of the plant These useful microorganisms provide plants with nutrients protect them from pathogens and help them combat abiotic stresses It is important that these mutualistic interactions between plant and soil microbes are well understood so as to develop reliable products in the form of biostimulants and biopesticides as well as managing biotic and abiotic stresses in crops Apart from enhancing crop productivity plant microbe interactions can also perform activities such as reclamation of degraded lands degradation of pollutants and remediation of saline or marginal lands This book is of interest to teachers researchers plant scientists and microbiologists Also the book serves as additional reading material for undergraduate and graduate students of agriculture microbiology biotechnology ecology soil science and environmental sciences

**Capacity Building for Maritime Security** Christian Bueger,Timothy Edmunds,Robert McCabe,2020-10-09 This book studies recent attempts to restructure maritime security sectors through capacity building It innovates both theoretically and empirically It proposes a new framework for understanding maritime capacity building drawing on work in peacebuilding and security sector reform The framework is then applied across empirical case studies from the Western Indian Ocean WIO region written by scholars from the Global South The WIO region is a paradigmatic case to study maritime security and capacity building in action Countries in the region face the full gamut of maritime security challenges while their indigenous capacities to deal with these are often weak In consequence the region functions as an engine of innovation for maritime capacity building more widely The lessons and best practices from the region have importance consequences for addressing maritime security across the globe

**Plant-Microbe Dynamics** Tanveer Bilal Pirzadah,Bisma Malik,Khalid Rehman Hakeem,2021-06-06 Plants and microbes have co evolved and interacted with each other in nature Understanding the complex nature of the plant microbe interface can pave the way for novel strategies to improve plant productivity in an eco friendly manner The microbes associated with plants often called plant microbiota are an integral part of plant life The significance of the plant microbiome is a reliable approach toward sustainability to meet future food crises and rejuvenate soil health Profiling plant associate microbiomes genome assemblies of all microbes is an emerging concept in understanding plant microbe interactions Microbiota extends the plant capacity to acclimatize fluctuating environmental conditions through several mechanisms Thus unraveling the mystery of plant microbe dynamics through latest technologies to better understand the role of metabolites and signal pathway mechanisms is very important This book shares the latest insight on omics technologies to unravel plant

microbe dynamic interactions and other novel phytotechnologies for cleaning contaminated soils Besides it also provides brief insight on the recently discovered clustered regularly interspaced short palindromic repeats CRISPR Cas9 which is a genome editing tool to explore plant microbe interactions and how this genome editing tool helps to improve the ability of microbes plants to combat abiotic biotic stresses

**Air Power in the Indian Ocean and the Western Pacific** Howard M. Hensel, 2020-06-04 This book examines the security dynamics of the Indian Ocean and the Western Pacific concentrating upon an analysis and evaluation of the air power capabilities of the various powers active in the two regions The volume is designed to help improve understanding of the heritage and contemporary challenges confronting the global community in the Indian Ocean and the Western Pacific as well as to illuminate the policies of the various powers involved in the affairs of these regions and the military capabilities that are available in support of those policies The 16 individual chapters examine both the traditional and the non traditional threats that confront the various Indian Ocean and Western Pacific powers and assess the roles played by land based and naval fixed wing and rotary wing manned and unmanned aircraft as well as by offensively and defensively capable ballistic and cruise missiles in addressing these challenges In doing so the various chapters analyze and evaluate the air power doctrine capabilities deployment patterns and missions of the respective states In addition they assess the future issues challenges and responses involving air power as it acting in concert with other military instruments seeks to contribute to securing and promoting the interests of the state This book will be of much interest to students of air power strategic studies Asian and Middle Eastern politics and International Relations

**Illusions of Location Theory: Consequences for Blue Economy in Africa** Francis Onditi, Douglas Yates, 2021-01-05 Illusions of Location Theory Consequences for Blue Economy in Africa questions the relevance of location theory in explaining the coastal hinterland continuum and the implications for the utilization of blue economy ecosystem in such a contested space in Africa It pays more attention to territorial contestations maritime disputes vulnerabilities of landlocked states and expansionist policies as displayed through spatial organizational regimes These areas of investigation have previously been largely studied from the narrow perspective of location unduly focusing on comparative advantages of distance while neglecting the influence of forces such as technology ideology and the power of mental mapping in spatial decision making This volume puts forward the argument that the harmonious relationship between states and efficient exploitation of the blue economy ecosystem in ways that promote peace between states lies not only in the structural transformation of markets but also in bridging the spatial and social divide between the coastal and hinterland societies Thus this work proffers possibilities for a holistic regime for managing Africa s coastal hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy The combination of theoretical and empirical analysis buttressed by in depth case studies of what works in the management of blue economy ecosystem and what does not work make this volume ideal for researchers students and practitioners

interested in African regional studies African political economy political geography strategic military studies governance of seas and oceans and maritime science diplomacy      **Sustainable Utilization of Natural Resources** Prasenjit Mondal, Ajay K.
