- As noted, the new research on the impact of the 1990s on the economy has been mixed. The findings also suggest that the 1990s have been a period of relative stability in the economy, with the economy showing a steady upward trend. The findings also suggest that the economy has been able to maintain a relatively stable growth rate, despite the challenges of the 1990s. This is a positive sign for the economy, and it suggests that the economy is well-positioned to continue its upward trend in the future.
