The Habitats Directive Gregory Jones KC, 2012-11-05 Biodiversity within the European Union is under threat Almost a quarter of Europe s vascular plant species and 155 species of its native mammals birds reptiles and amphibians are threatened with extinction The Habitats Directive imposes a strict regime for environmental protection But with the euro zone economy falling from stagnation to contraction in the second quarter of 2012 and the UK entering into a double dip recession in April 2012 European governments face an economic crisis The English courts have said that the Directive should not become a property developer s obstacle course Yet the tensions between environmental protection and economic growth are all too readily apparent with the UK government stating both that we must arrest the decline in habitats and species and the degradation of landscapes and later that gold plating of EU rules on things like habitats was putting ridiculous costs on business enterprise Edited by Gregory Jones QC The Habitats Directive A Developer s Obstacle Course brings together a unique combination of leading academics and practitioners in the field of European environmental and planning law to address and debate controversial issues arising from the Habitats Directive in an authoritative and practical manner A must for anyone engaged in property development planning and environmental law

Patents Quarterly, 1994 *The Journal of Offshore Technology*, 1997 **The EC Common Fisheries Policy** Robin Churchill, Daniel Owen, 2010-03-04 The Common Fisheries Policy CFP is one of the longest established and more controversial of the common policies of the EC It deals principally with the management of fishery resources relations between the EC and third States in fisheries matters the marketing of and trade in fishery products financial assistance to the fisheries sector and aquaculture However the CFP is not just a matter for those with an economic interest in fisheries It also raises many issues of more general concern such as the capacity of the EC and its Member States to manage important natural resources sustainably the impact of fishing on the wider marine environment and relations between developed and developing States This book addresses the CFP from a legal perspective It provides a detailed account of the very large body of EC law comprising the CFP and draws on the European Commission's associated documents to aid interpretation and add context As a result the book will be of value to anyone wanting knowledge of the law of the CFP Although not addressing the Commission's 2009 Green Paper on reform of the CFP the book should provide a useful reference point against which to view the reform of parts of the CFP that is anticipated to take place over the next few years *The Habitats Directive in its EU Environmental Law Context* Charles-Hubert Born, An Cliquet, Hendrik Schoukens, Delphine Misonne, Geert Van Hoorick, 2014-11-27 This book analyses the Habitats Directive one of the most prominent pieces of EU environmental legislation of the past decades Seen by some as the cornerstone of Europe's nature conservation policy among other measures the Directive established the so called Natura 2000 ecological network which covers more than 18% of the surface of the EU However despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and species in Europe are being adequately protected while 10-60% of animal species remain under threat In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures of the Habitats Directive from a legal and political angle The book brings together international experts to consider the application implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty first century Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation **Beat about the Bush** Trevor Carnaby, 2008 Revealing fascinating insights into the mysterious lives of birds native to the mother continent this remarkable guide exhibits the many vibrantly colorful species found in the South African bush Providing an in depth discourse on all aspects of bird life detailing their myriad forms survival strategies in a harsh landscape breeding and feeding behaviors movements migrations preferred habitat unique behavioral patterns and vocalizations this comprehensive manual also expertly advises on how to easily and accurately identify each individual species Populated with more than 900 brilliantly vivid photographs and exhaustively researched to fill the gap in existing literature and field guides this essential reference
