South Africa and United Nations Peacekeeping Offensive Operations Antonio Garcia,2018-08-17 The creation of the Force Intervention Brigade FIB as the sharp tactical edge of the United Nations Stabilisation Mission in the Democratic Republic of the Congo MONUSCO tasked with the neutralising of armed groups was a watershed moment in the history of modern peace missions What was more significant was that sub Saharan national leaders were instrumental in the creation of the FIB South Africa Tanzania and Malawi but lacked the resources to deploy such a force and consequently the brigade was deployed under the banner of the UN With the legacy of an African Renaissance and its role in the conception of the FIB South Africa remains a critical player in international peace and security in sub Saharan Africa and therefore holds a key strategic role in achieving the FIBs objectives This comes at a critical time where blue helmets are increasingly exposed to complex and challenging security contexts The aim of this work is to provide a conceptual model for South African military future operations and UN offensive peacekeeping operations In this undertaking a layer of military and Clausewitzian theory is added to offensive peacekeeping operations Furthermore there are sections on operational constructs capstone and operating concepts doctrine and structural elements as well a section on mine action This book contributes towards an understanding of the nature of modern strategy through the lens of UN offensive peacekeeping operations and provides insights into operational challenges *Daily Graphic* Ransford Tetteh,2014-09-10

Numerical Methods and Implementation in Geotechnical Engineering - Part 1 Y.M. Cheng,J. H. Wang,L. Liang,W. H. Fung Ivan,2020-04-01 Numerical Methods and Implementation in Geotechnical Engineering explains several numerical methods that are used in geotechnical engineering The first part of this reference set includes methods such as the finite element method distinct element method discontinuous deformation analysis numerical manifold method smoothed particle hydrodynamics method material point method plasticity method limit equilibrium and limit analysis plasticity slope stability and foundation engineering optimization analysis and reliability analysis The authors have also presented different computer programs associated with the materials in this book which will be useful to students learning how to apply the models explained in the text into practical situations when designing structures in locations with specific soil and rock settings This reference book set is a suitable textbook primer for civil engineering students as it provides a basic introduction to different numerical methods classical and modern in comprehensive readable volumes

Numerical Methods and Implementation in Geotechnical Engineering - Part 2 Y.M. Cheng,J. H. Wang,L. Liang,W. H. Fung Ivan,2020-04-20 Numerical Methods and Implementation in Geotechnical Engineering explains several numerical methods that are used in geotechnical engineering The second part of this reference set includes more information on the distinct element method geotechnical optimization analysis and reliability analysis Information about relevant additional numerical methods is also provided in each chapter with problems where applicable The authors have also presented different computer programs associated with the materials in this book set

which will be useful to students learning how to apply the models explained in the text into practical situations when designing structures in locations with specific soil and rock settings This reference book set is a suitable textbook primer for civil engineering students as it provides a basic introduction to different numerical methods classical and modern in comprehensive readable volumes *EuroKarst 2016, Neuchâtel* Philippe Renard, Catherine Bertrand, 2017-01-03 This book presents the latest advances in the field of karst hydrogeology and carbonate reservoirs These include but are not limited to geomorphology of karst flow and solute transport in karst innovative metrology modelling speleogenesis and geology of carbonate reservoirs deep reservoir exploration and production water management and protection in karst environments contaminant migration and chemical behavior hydrochemistry and regional aquifer studies EuroKarst offers a platform for professional exchanges between field practitioners and academic researchers It is the European biennial conference on the hydrogeology of karst and carbonate reservoirs It is organized every two years by the Universities of Neuchâtel Switzerland Besançon France and Malaga Spain *Geosynthetics for Development of Transportation Infrastructures* Sujit Kumar Dash, Castorina Silva Vieira, 2021-05-05 *Century Edition of The American Digest*, 1897 **Wait's Practice at Law** William Wait, 1923 [Spatial Modelling and Failure Analysis of Natural and Engineering Disasters through Data-based Methods](#) Faming Huang, Jinsong Huang, Wei Chen, Jinqian Liu, 2022-10-07 *Annual Report South Africa*. Cyclones in Southern Africa Godwell Nhamo, Kaitano Dube, 2021-07-24 The subject of tropical cyclones in Southern Africa also known as hurricanes or typhoons in other regions of the world has been growing over the past few decades However there is still limited literature on foundational and fundamental topics on the matter To this end this book addresses this gap citing some examples from both historic and recent tropical cyclones The book presents meteorological and climatic aspects of tropical cyclones including reviews on forecasting warning message dissemination and public response aspects of early warning systems with a focus on the Tropical Cyclones Idai and Kenneth Fundamentals in disaster risk reduction DRR are also discussed moving from the provisions of the Hyogo Framework for Action 2005 2015 to the Sendai Framework for Disaster Risk Reduction 2015 2030 Climate change issues are central to the publication as well as the role of information and communication technologies in DRR and management The book also tackles some challenges and opportunities associated with the implementation of regional legal and institutional frameworks on DRR The book comes as part of a series with three volumes The other volumes include Cyclones in Southern Africa Vol 1 Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe and Cyclones in Southern Africa Vol 3 Implications for the Sustainable Development Goals To this end this book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies economics sustainable development development studies environmental sciences arts geography life sciences politics planning and public health

Influence of Fine Particles on the Liquefaction Properties of a Reference Sand Zhehao Zhu, 2023-02-11 Over the past thirty years the liquefaction of sand containing a small amount of fine particles has become an engaging topic in the geotechnical community Indeed a great variety of field investigations revealed that the real liquefied soils are mainly composed of a host sand matrix and a small fraction of plastic or non plastic fines In this context several series of monotonic and cyclic triaxial tests were performed to clarify the influence of these fine particles on the development of sand liquefaction

To get closer to in situ conditions 1g shaking table tests were carried out with two different sized model soil containers The first one small size was essentially used to check the reconstitution and the saturation method The second one very large size was manufactured to explore the sand liquefaction behaviour during base shaking in an almost actual engineering size To numerically reproduce the sand liquefaction behaviour the Dafalias model has been taken as an example and its input parameters were calibrated by an artificial intelligence method An in depth analysis of the proposed method was done with the elastoplastic theory

Reflections on the Complexities of the Covid-19 Pandemic Shadrack B. Ramokgadi, Mbekezeli C. Mkhize, 2022-12-31 This book offers an original and timeous snapshot of contemporary lines of argument from various authors in the Global South on the Covid 19 pandemic as a complex emergency at the height of the pandemic At the time of writing there were various levels of uncertainties from different countries citizens the public and private sectors industries and economies who were in disarray The book traces the origins of the Covid 19 pandemic in the province of Wuhan in China the challenges and the responses from a multiplicity of countries particularly from the Global South Of particular importance the book notes that vaccine uncertainty limiting the spread of the virus and loss of life and employment were some of the major challenges that these governments and citizens were confronted with Also the sizes of various economies lead to various challenges that the abovementioned governments shouldered The contributors shed light on various aspects related to the Covid 19 pandemic from various countries in the Global South and include but were not limited to securitised lockdowns the use of militaries and complete closures of national and sometimes fragile economies as well as overburdened health systems These are just some dire consequences of Covid 19 on the public and private sector industries and economy The book emphasises that despite myriad challenges reported there are various lessons that can be learnt in terms of how the countries responded to the pandemic and in terms of how future pandemics can be handled Finally this is an interesting piece of work wherein contributors as a collective seek to shed light with regards to the unique perspectives from the Global South and at the same time give some guidance related to their specific areas of focus
