Collection Development Policies and Management Techniques of E-Resources of Central University Libraries Dr Vijaykumar Bhimrao, The Political Economy of Climate Finance Effectiveness in Developing Countries Mark Purdon, 2024 In The Political Economy of Climate Finance Effectiveness in Developing Countries Mark Purdon contributes to broader debates on the international climate cooperation by evaluating how three different climate finance instruments have been undertaken in three countries Tanzania Uganda and Moldova and evaluates their effectiveness in actually reducing emissions He shows that the effectiveness of climate finance tools depends on the interaction between a nation's development policy paradigms and its interests in other sectors of their economies Purdon's findings further inform the design of international and transnational efforts to engage developing countries on climate change mitigation by emphasizing the importance of domestic politics and the state *Civic Engagement in Food System Governance* Alan R. Hunt, 2015-10-05 The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences *Mountains: Physical, Human-Environmental, and Sociocultural*

Dynamics Mark A. Fonstad, 2018-12-07 Mountains have captured the interests and passions of people for thousands of years. Today millions of people live within mountain regions and mountain regions are often areas of accelerated environmental change. This edited volume highlights new understanding of mountain environments and mountain peoples around the world. The understanding of mountain environments and peoples has been a focus of individual researchers for centuries; more recently, the interest in mountain regions among researchers has been growing rapidly. The articles contained within are from a wide spectrum of researchers from different parts of the world who address physical, political, theoretical, social, empirical, environmental, methodological, and economic issues focused on the geography of mountains and their inhabitants. The articles in this special issue are organized into three themed sections with very loose boundaries between themes: 1. physical dynamics of mountain environments, 2. coupled human physical dynamics, and 3. sociocultural dynamics in mountain regions. This book was first published as a special issue of the *Annals of the American Association of Geographers*. *Routledge Handbook of the Contemporary Philippines* Mark Thompson, Eric Vincent Batalla, 2018-02-19 The Philippines is a fascinating example of a poor country democracy where issues of economic development and poverty, political participation and stability, as well as ethnicity and migration are crucial. The *Routledge Handbook of the Contemporary Philippines* provides a comprehensive overview of the current political, economic, social, and cultural issues of the country. The Handbook is divided into the following four sections, concentrating on a different aspect of the Philippines: domestic politics, foreign relations, economics and social policy, and cultures and movements. In terms of domestic politics, chapters discuss clientelism, bossism, dynasties, pork barrel, and corruption, as well as institutions: the presidency, congress, the judiciary, the civil service, political parties, and civilian-military relations. The Philippines is confronted with many overseas challenges with the foreign relations section focused on the country's relationship with China, Japan, and the USA, as well as assessing the impact of the Filipino diaspora community around the world. Regarding economics and social policy, authors examine industrial policy, capital flight, microfinance, technocracy, economic nationalism, poverty, social welfare programs, and livelihoods. The final section on Philippine cultures and movements highlights issues of customs, gender, religion, and nationalism, while also examining various social and political forces: the peasantry, the middle class, indigenous peoples, NGOs, the left, trade unionism, the women's movement, and major insurgencies. Written by leading experts in the field, the Handbook provides students, scholars, and policymakers of Southeast Asia with an interdisciplinary resource on the evolving politics, society, and economics of the Philippines. **Sensing Techniques for Next Generation Cognitive Radio Networks** Bagwari, Ashish, Bagwari, Jyotshana, Tomar, Geetam Singh, 2018-08-30 The inadequate use of wireless spectrum resources has recently motivated researchers and practitioners to look for new ways to improve resource efficiency. As a result, new cognitive radio technologies have been proposed as an effective solution. *Sensing Techniques for Next Generation Cognitive Radio Networks* is a pivotal reference source that provides vital research on the application of spectrum sensing techniques. While

highlighting topics such as radio identification compressive sensing and wavelet transform this publication explores the standards and the methods of cognitive radio network architecture This book is ideally designed for IT and network engineers practitioners and researchers seeking current research on radio scene analysis for cognitive radios and networks

in South Asia Peter Ellis, Mark Roberts, 2015-11-13 The number of people in South Asia s cities rose by 130 million between 2000 and 2011 more than the entire population of Japan This was linked to an improvement in productivity and a reduction in the incidence of extreme poverty But the region s cities have struggled to cope with the pressure of population growth on land housing infrastructure basic services and the environment As a result urbanization in South Asia remains underleveraged in its ability to deliver widespread improvements in both prosperity and livability Leveraging Urbanization in South Asia is about the state of South Asia s urbanization and the market and policy failures that have taken the region s urban areas to where they are today and the hard policy actions needed if the region s cities are to leverage urbanization better This publication provides original empirical and diagnostic analysis of urbanization and related economic trends in the region It also discusses in detail the key policy areas the most fundamental being urban governance and finance where actions must be taken to make cities more prosperous and livable **Understanding the Human Factor of the Energy**

Transition: Mechanisms Underlying Energy-Relevant Decisions and Behaviors Tobias Brosch, David Sander, Martin K. Patel, 2016-06-27 An increasing number of countries are shifting toward sustainable energy economies emphasizing the use of renewable energy sources increases in energy efficiency and the abatement of greenhouse gas emissions The success of such an energy transition will depend not only on the development of new energy technologies but also on major changes in

the patterns of individual energy related decisions and behaviors resulting in substantial reductions in energy demand. Consequently the behavioral sciences can make important contributions to the energy transition by increasing our understanding of the multiple factors and mechanisms that underlie individual as well as group based decisions and behaviors in the energy domain and by creating a basis for systematic interventions that reduce energy usage. Many different types of relevant behaviors and decisions need to be considered in this context including decisions to invest in energy efficient household equipment, adjustments of energy critical habits related to heating, eating or mode of transportation and participation in the political discourse related to questions of energy. An integration of the expertise of the different disciplines of the behavioral sciences is thus needed to comprehensively investigate the impact of the different drivers and barriers that may determine energy related decisions and behaviors including economic factors such as price level, social factors such as norms, communication patterns and social learning processes and individual factors such as values, attitudes, beliefs, heuristics, affective biases and emotions. The potential impact of these factors on the success of the energy transition is considerable. For example, a recent projection of the energy demand in Switzerland until 2050 has estimated the reduction potential related to psychological and sociological factors between 0% and 30% depending on which behavioral changes will be implemented in society. Increased research efforts from the behavioral sciences are required to ensure that the full reduction potential can be achieved. This Research Topic brings together contributions from different disciplines such as psychology, affective science, behavioral economics, economics, sociology, consumer behavior, business science, sociology and political science that improve our understanding of the many factors underlying decision making and behavior in the energy domain and contribute to the development of targeted interventions that aim at reducing energy demand based on these factors.
