S2014 April Mark Scheme:

From Civil Partnership to Same-Sex Marriage Nicola Barker, Daniel Monk, 2015-04-17 The Civil Partnership Act 2004 and the Marriage Same Sex Couples Act 2013 are important legal social and historical landmarks rich in symbolic material and cultural meanings While fiercely opposed by many within mainstream narratives they are often represented as a victory in a legal reform process that commenced with the decriminalisation of homosexuality Yet at the same time for others they represent a problematic and ambivalent political engagement with the institution of marriage Consequently understood or labelled as revolutionary progressive and conservative these legal reforms provide a space for thinking about issues that arguably affect everyone regardless of sexual orientation or relationship status This edited collection brings together scholars and commentators from a range of backgrounds generations and disciplines to reflect on the first ten years of civil partnerships and the introduction of same sex marriage Rather than rehearsing the arguments for and against relationship recognition the essays ask original questions draw on a variety of methods and collectively provide a detailed and reflective snap shot of a critical moment a history of the present as well as providing a foundation for innovative ways of thinking about and engaging with the possibilities and experiences arising from the new reality of relationship recognition for gays and lesbians

Empirical Bioethics: Dilemmas of Genetic Testing and Euthanasia in Israel and Germany Aviad E. Raz,Silke

Schick Tanz,2016-04-29 This book is a comprehensive empirically grounded exploration of the relationship between bioethics culture and the perspective of being affected It provides a new outlook on how complex bioethical issues become questions of everyday life The authors focus on two contexts genetic testing and end of life care to locate and demonstrate emerging themes of responsibility such as self responsibility responsibility for kin and the responsibility of society Within these themes the duty to know versus the right not to know one's genetic fate in the context of genetic testing or the sanctity of life versus self determination in the context of end of life care are identified as culturally embedded dilemmas that are very much relevant for lay persons Furthermore cultural factors such as religion history utopian and dystopian views of biomedical technologies outlooks on the body and on health illness and citizenship are examined Health issues are increasingly becoming a question of assessing risk and responsibility How can we better prepare ourselves for the future We all make such assessments in a way that combines personal inclinations professional recommendations and cultural framings There is still much to be learned about the interplay between these three dimensions *Conflict Propaganda in Syria* Oliver

Boyd-Barrett,2021-12-28 This book investigates rival narratives about the conflict in Syria from 2011 onwards It examines the starkly different narratives about the Syrian conflict told by mainly Western mainstream and alternative media and contrasts these narratives with the equally polarized but more nuanced narratives of mainly Western scholars and long form journalists Differences of narrative concerning the conflict include what is deemed relevant context in trying to explain the war whether the war is best seen as a civil conflict or as a proxy war fought among external powers the degree of emphasis given to the alleged crimes of the Syrian regime as opposed to the alleged violence of Salafist militia the accuracy of the origin story of the conflict in Daraa the extent to which the initial protestors were secular campaigners calling for democracy or whether they were Muslim extremists seeking a sectarian society governed by sharia law Several case studies of propaganda institutions are examined here including the journalism of Marie Colvin the role of government funded NGOs the controversies surrounding each of three major instances of alleged regime use of chemical weapons and the politicization of the Organization for the Prohibition of Chemical Weapons OPCW This book will be of much interest to students of media and communication studies propaganda studies Middle Eastern politics and International Relations in general *Hubs of Illicit*

Trade in the Global Economy Yulia Krylova,2024-09-30 This book meticulously examines how centers of illicit trade pose myriad threats to global security and sustainable development The exponential growth of illicit trade resulting in annual

losses amounting to trillions of dollars for the global economy is increasingly concentrated within specific geographic areas. These locales serve as safe havens for smugglers and their accomplices, fostering a criminal ecosystem that facilitates the convergence of various criminal activities. The book underscores the detrimental impact of poorly regulated international free trade zones which prioritize expediency over security, thereby allowing illicit trade to flourish in regions characterized by opaque governance and lax regulatory oversight. It comprehensively explores the spectrum of illicit trade present in notorious hubs such as the Argentina-Brazil-Paraguay Tri Border Area, Dubai, Panama, Belize, Guatemala, and Ukraine. Emphasizing the phenomenon of crime convergence associated with these hubs, the book offers actionable recommendations for disrupting their interconnected illicit supply chains, infrastructures, and networks. By addressing this interconnectedness, the book fills a critical void in understanding how vulnerabilities within the global economy fuel the creation of illicit trade hubs. It will be of great value to researchers in the fields of trade, economics, criminology, and international development. It will also be an excellent resource for government agencies, policymakers, and private sector managers in those industries most affected by the growing problem of illicit trade.

Getting Welfare to Work Mark Considine, Jenny M. Lewis, Siobhan O'Sullivan, E. Sol, 2015. Getting Welfare to Work traces the development of the Australia, UK, and Dutch employment services systems. Each system has undergone radical policy change since 1998 with a trend toward outsourcing and service privatisation as governments search for ways to get welfare systems working in effective, efficient, and politically acceptable ways. Using interviews and survey data, this book tells the story of those bold reforms from the perspective of the frontline staff who work directly with jobseekers over a fifteen-year period. It shows how new ways of thinking about public services have impacted on service delivery organisations and those who work with welfare clients.
