Lawrence Brian Lombard, 2019-03-06 Originally published in 1986 The theory of events presented is one that construes events to be concrete particulars and it embodies an attempt to take seriously the idea that events are the changes that objects undergo when they change The theory is about what an event really is about when events are identical about what properties events have essentially and about what relations events bear to entities of other kinds In addition this book contains an account of what philosophers are up to when they provide reasons for thinking that objects belonging to metaphysically interesting kinds exist It also gives an account of the role of criteria of identity eg identical sets must have the same members in such reasons and an account of what criteria of identity must be like in order for them to be able to play such a role **Routledge Library Editions: Metaphysics** Various Authors, 2021-06-23 Reissuing works originally published between 1937 and 1992 this collection of original texts addresses the philosophical realm of metaphysics not only

ontology but the philosophy of science religion and morals The theory of values and the theory of absolutes are the subject of more than one volume while others take a broader spectrum and outlay the history of the philosophical arguments The nature of objects and questions of being and identity are addressed from very different perspectives With some volumes by very eminent thinkers this is a great addition to any collection on philosophy **Bitstreams** Matthew G.

Kirschenbaum,2021-10-08 In Bitstreams Matthew G Kirschenbaum distills twenty years of thinking about the intersection of digital media textual studies and literary archives to argue that bits the ubiquitous ones and zeros of computing always depend on the material world that surrounds them to form the bulwark for preserving the future of literary heritage

Memory, Intermediality, and Literature Sara Tanderup Linkis,2019-04-16 If readers of Sara Tanderup Linkis Something to hold on to open the book in the expectation of entering a niche of literature and literary studies they will leave it after having encountered a new highway in literature Here the traditional theme of memory and the most recent use of digital media merge into a new understanding of the role of the book in the contemporary media landscape and of vicissitudes of memorial processes literature which also offers a broader perspective on literature in human history Spurred by Sara Tanderup Linkis sharp eye the readings of texts are lucid engaging and offers so many ideas that teachers will renew their curricula and readers will open the internet for more or rush to the library Svend Erik Larsen professor emeritus Memory Intermediality and Literature investigates how selected literary works use intermedial strategies to represent and perform cultural memory Drawing on the theoretical perspectives of cultural memory studies this engaging reader friendly monograph examines new materialism and intermediality studies analyzing works by Alexander Kluge W G Sebald Jonathan Safran Foer Anne Carson Mette Hegnh j William Joyce J J Abrams and Doug Dorst The works emerge out of different traditions and genres ranging from neo avant garde montages through photo novels and book objects to apps and children s stories In this new monograph Sara Tanderup Linkis presents an interdisciplinary and comparative approach reading the works together across genres and decades and combining the perspectives of memory studies and materialist and media oriented analysis This approach makes it possible to argue that the works not only use intermedial strategies to represent memory but also to remember literature reflecting on the changing status and function of literature as a mediator of cultural memory in the age of new media Thus the works may be read as reactions to modern media culture suggesting the ways in which literature and memory are affected by new media and technologies photography and television as well as iPads and social media Ship of Theseus J. J. Abrams,Doug Dorst,2013 A young woman picks up a book left behind by a stranger Inside it are his margin notes which reveal a reader entranced by the story and by its mysterious author She responds with notes of her own leaving the book for the stranger and so begins an unlikely conversation that plunges them both into the unknown The book Ship of Theseus the final novel by a prolific but enigmatic writer named V M Straka in which a man with no past is shanghaied onto a strange ship with a monstrous crew and launched onto a disorienting and perilous journey The

Coffman, Theophilus Savvas, 2020-12-17 Several of American literature's most prominent authors and many of their most perceptive critics and reviewers argue that fiction of the last quarter century has turned away from the tendencies of postmodernist writing Yet the nature of that turn and the defining qualities of American fiction after postmodernism remain less than clear This volume identifies four prominent trends of the contemporary scene the recovery of the real a rethinking of historical engagement a preoccupation with materiality and a turn to the planetary Readings of works by various leading figures including Dave Eggers Jonathan Franzen A M Homes Lance Olsen Richard Powers William T Vollmann and David Foster Wallace support a variety of arguments about this recent revitalization of American literature The chapters in this book were originally published as a special issue of the journal *Textual Practice* The Novel as Network Tim Lanzendörfer, Corinna Norrick-Rühl, 2020-09-23 The Novel as Network Forms Ideas Commodities engages with the contemporary Anglophone novel and its derivatives and by products such as graphic novels comics podcasts and Quality TV This collection investigates the meaning of the novel in the larger system of contemporary media production and post print culture viewing the novel through the lens of actor network theory as a node in the novel network Chapters underscore the deep interconnection between all the aspects of the novel between the novel as a literary form as an idea and as a commodity Bringing together experts from American British and Postcolonial Studies as well as Book Publishing and Media Studies this collection offers a new vantage point to view the novel in its multifaceted expressions today *The Moral Worlds of Contemporary Realism* Mary K. Holland, 2020-06-11 Literature has never looked weirder full of images colors gadgets and footnotes and violating established norms of character plot and narrative structure Yet over the last 30 years critics have coined more than 20 new realisms in their attempts to describe it What makes this decidedly unorthodox literature realistic And if it is then what does realism mean anymore Examining

literature by dozens of writers and over a century of theory and criticism about realism The Moral Worlds of Contemporary Realism sorts through the current critical confusion to illustrate how our ideas about what is real and how best to depict it have changed dramatically especially in recent years Along the way Mary K Holland guides the reader on a lively tour through the landscape of contemporary literary studies taking in metafiction ideology posthumanism postmodernism and poststructuralism with forays into quantum mechanics new materialism and Buddhism as well to give us entirely new ways of viewing how humans use language to make sense of and to make the world *Media Ecologies of Literature* Susanne Bayerlipp,Ralf Haekel,Johannes Schlegel,2022-11-03 This book explores the media ecologies of literature the ways in which a literary text is interwoven in its material technical performative praxeological affective and discursive network and which determine how it is experienced and interpreted Through novel approaches to the complex contingent and interdependent environments of literature this volume demonstrates how questions about the mediality of literature particularly in the wake of digitization shed a new light on our understanding of textuality reading platforms and reception processes By drawing on recent developments in advanced media theory *Media Ecologies of Literature* emphasizes the productivity of innovative re conceptualizations of literature as a medium in its own right In an intentionally wide historical scope the essays engage with literary texts from the Romantic to the contemporary period from Charlotte Smith and Oscar Wilde to A L Kennedy and Mark Z Danielewski from the traditionally printed novel to audiobooks and reading apps *Key Concepts in Philosophy* Paddy McQueen,2010-07-14 An accessible account of philosophical concepts theories and key thinkers with an emphasis on recent developments in the field Containing over 300 entries the terms are ordered alphabetically and cross referenced for ease of use Suggestions for further reading follow the explanations encouraging further reflection and independent learning

divorced from the problem of understanding consciousness The results support a realist theory of truth and of universals and open the way for a nonfoundationalist and nonholistic approach to epistemology A Bradford Book *Notes and Queries: A Medium of Inter-Communication for Literary Men, Artists, Antiquaries, Genealogists, Etc* ,1882 *Graham Priest on Dialetheism and Paraconsistency* Can Başkent,Thomas Macaulay Ferguson,2020-01-01 This book presents the state of the art in the fields of formal logic pioneered by Graham Priest It includes advanced technical work on the model and proof theories of paraconsistent logic in contributions from top scholars in the field Graham Priest s research has had a considerable influence on the field of philosophical logic especially with respect to the themes of dialetheism the thesis that there exist true but inconsistent sentences and paraconsistency an account of deduction in which contradictory premises do not entail the truth of arbitrary sentences Priest s work has regularly challenged researchers to reappraise many assumptions about rationality ontology and truth This book collects original research by some of the most esteemed scholars working in philosophical logic whose contributions explore and appraise Priest s work on logical approaches to problems in philosophy linguistics computation and mathematics They provide fresh analyses critiques and applications of Priest s work and attest to its continued relevance and topicality The book also includes Priest s responses to the contributors providing a further layer to the development of these themes
