Silencing the Guns in Africa Antonio Garcia, Jacob Udo-Udo Jacob, 2025-03-14 The scholarship of this book is drawn from local and international experts by framing critically a number of discourses on matters of security conflict violence and peace on the African continent It is indeed a breath of fresh air to the scientific community largely because it contributes to the on going debates on security issues Dr Ntsikelelo Benjamin Breakfast Director of the Center for Security Peace and Conflict Resolution at Nelson Mandela University This book makes a deep contribution to scholarly literature on conflict studies peacekeeping and peacebuilding in Africa Written largely from the perspective of the applied social sciences it is empirically rich and offers refreshing insights into social behaviour in military contexts This is a timely contribution because current

public discourse in South Africa is centred on the gains and missed opportunities of thirty years of democracy and new lenses are welcome. Many of the chapters reflect South African experiences. This is to be welcomed as it demonstrates that scholars and practitioners from the country are reflecting on the complexities of South African experiences of defence and security matters in contemporary times. Dr Sandy Africa, Director of Research at Mapungubwe Institute for Strategic Reflection (MISTRA). This volume brings together the voices of scholars and practitioners, a diverse group of writers who are passionate about and committed to creating a safer, more prosperous and peaceful Africa. Each with their own specialism, this work combines many different world views and approaches. Conflict in Africa is an impossibly broad topic to cover in a single edited publication and so we focus on a select number of case studies, expositions and themes. *Nigeria-South Africa Relations and Regional Hegemonic Competence* Oluwaseun Tella, 2018-11-27. This book examines the relations between Nigeria and South Africa and their implications for regional influence across the African continent. With the largest and third largest economies in the region and a historical status as the major peacemakers on the continent, it is often argued that Africa's fate is directly linked to the success or failure of these regional powers. While there is widespread reference to each state's capabilities and regional influence in the extant literature, little analysis is offered on relations between Nigeria and South Africa and their impact on regional governance and provision of public goods on the continent. This book attempts to fill the gap by engaging issues such as the hegemonic competence of the states, their credentials for a permanent seat at the UNSC, their efforts towards regional integration and their efforts towards combating the dark side of globalization, including climate change, drug trafficking and xenophobia. It also engages a gender perspective to these states' relations as well as their experiences of transitional justice. Providing an in-depth comparative analysis of the two so-called African powerhouses, this volume will be of interest to policy makers, academics and students interested in Nigeria and South Africa's foreign policy, regional powerhood and the African peace, security and development agenda. **The Geography of South Africa** Jasper Knight, Christian M. Rogerson, 2018-10-03. This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross-section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South. All chapters are original contributions providing a state-of-the-art research baseline on key themes in physical, human and environmental geography and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world, including issues of sustainable development and growth in the Global South. *Additive Manufacturing Applications for Metals and Composites* Balasubramanian, K.R., Senthilkumar, V., 2020-06-19. Additive manufacturing (AM) of metals and composites using laser energy, direct energy deposition, electron beam methods and wire arc melting have recently gained importance due to their advantages in fabricating the complex structure. Today it has become possible to reliably manufacture dense parts with

certain AM processes for many materials including steels aluminum and titanium alloys superalloys metal based composites and ceramic matrix composites In the near future the AM material variety will most likely grow further with high performance materials such as intermetallic compounds and high entropy alloys already under investigation Additive Manufacturing Applications for Metals and Composites is a pivotal reference source that provides vital research on advancing methods and technological developments within additive manufacturing practices Special attention is paid to the material design of additive manufacturing of parts the choice of feedstock materials the metallurgical behavior and synthesis principle during the manufacturing process and the resulted microstructures and properties as well as the relationship between these factors While highlighting topics such as numerical modeling intermetallic compounds and statistical techniques this publication is ideally designed for students engineers researchers manufacturers technologists academicians practitioners scholars and educators

Counter-Unmanned Aircraft System (CUAS) Capability for Battalion-and-Below Operations National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Counter-Unmanned Aircraft System (CUAS) Capability for Battalion-and-Below Operations, 2018-03-29 The development of inexpensive small unmanned aircraft system sUAS technologies and the growing desire of hobbyists to have more and more capability have created a sustained sUAS industry however these capabilities are directly enabling the ability of adversaries to threaten U S interests In response to these threats the U S Army and other Department of Defense DoD organizations have invested significantly in counter sUAS technologies often focusing on detecting radio frequency transmissions by sUASs and or their operators and jamming the radio frequency command and

control links and Global Positioning System signals of individual sUASs However today s consumer and customized sUASs can increasingly operate without radio frequency command and control links by using automated target recognition and tracking obstacle avoidance and other software enabled capabilities The U S Army tasked the National Academies of Sciences Engineering and Medicine to conduct a study to address the above concerns In particular the committee was asked to assess the sUAS threat particularly when massed and collaborating assess current capabilities of battalion and below infantry units to counter sUASs identify counter sUAS technologies appropriate for near term mid term and far term science and technology investment consider human factors and logistics and determine if the Department of Homeland Security could benefit from DoD efforts This abbreviated report provides background information on the full report and the committee that prepared it

Intelligent Analytics for Industry 4.0 Applications Avinash Chandra Pandey,Abhishek Verma,Vijaypal Singh Rathor,Munesh Singh,Ashutosh Kumar Singh,2023-06-06 The advancements in intelligent decision making techniques have elevated the efficiency of manufacturing industries and led to the start of the Industry 4 0 era Industry 4 0 is revolutionizing the way companies manufacture improve and distribute their products Manufacturers are integrating new technologies including the Internet of Things IoT cloud computing and analytics and artificial intelligence and machine learning into their production facilities throughout their operations In the past few years intelligent analytics has emerged as a solution that examines both historical and real time data to uncover performance insights Because the amount of data that needs analysis is growing daily advanced technologies are necessary to collect arrange and analyze incoming data This approach enables businesses to detect valuable connections and trends and make decisions that boost overall performance In Industry 4 0 intelligent analytics has a broader scope in terms of descriptive predictive and prescriptive subdomains To this end the book will aim to review and highlight the challenges faced by intelligent analytics in Industry 4 0 and present the recent developments done to address those challenges
