South Africa Business and Investment Opportunities Yearbook The Promise of Adolescence National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Division of Behavioral and Social Sciences and Education,Board on Children, Youth, and Families,Committee on the Neurobiological and Socio-behavioral Science of Adolescent Development and Its Applications,2019-08-26 Adolescence beginning with the onset of puberty and ending in the mid 20s is a critical period of development during which key areas of the brain mature and develop These changes in brain structure function and connectivity mark adolescence as a period of opportunity to discover new vistas to form relationships with peers and adults and to explore one s developing identity It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course Because adolescents comprise nearly one fourth of the entire U S population the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence rather than focusing myopically on containing its risks This report examines the neurobiological and socio behavioral science of adolescent development and outlines how this knowledge can be applied both to promote adolescent well being resilience and development and to rectify structural barriers and inequalities in opportunity enabling all adolescents to flourish **Management Of Transboundary Water Resources Under Scarcity: A**

Multidisciplinary Approach Ariel Dinar,Yacov Tsur,2017-03-17 Water scarcity due to climate change population growth and economic development is a critical issue in many semi arid and arid regions around the world Water scarcity is especially critical in regions where water is shared by several riparian states and used for competing purposes irrigation domestic industry environment and hydropower There is evidence that water scarcity may give rise to conflicts among the riparian states that share water basins At the same time there is evidence that proper arrangements among riparian states create a basis for cooperation which is a necessary condition for economic development food production environmental sustainability and poverty reduction This book presents a collection of work presented by a group of academics and policy experts dealing with the impact of water scarcity and variability on the ability to jointly manage shared water and the derived welfare of international states and nations sharing international river basins consisting of economics technology law and institutions geography and international relations The book covers theoretical aspects of management of transboundary water as well as case studies from hotspots around the world The unique aspect of this book is the multidisciplinary nature of the chapters reflecting a new field of research that will gain popularity as water scarcity will increase over time and across regions The chapters from the book were presented at the Management of Transboundary Water Resources under Scarcity Perspectives on Agriculture and Food Security workshop held at The Hebrew University of Jerusalem Israel from June 22 to 23 2015
