**Silence** Maria-Luisa Achino-Loeb, 2005-12-01

This book is about silence and power and how they interact. It argues that only by studying how silence works how it is implicated in the construction of meaning can we arrive at the elusive roots of power in all its dimensions. Silence becomes the currency of power by delineating the margins or what we perceive and through a sleight of hand wherein behaviors undertaken in the service of self interest appear instead as inevitable and devoid of human agency. The theoretical load of this argument is carried by vivid ethnographic material dealing with music linguistic behavior racial conflicts work dislocations and the construction of anthropological subjects and texts

**Anthropology and Sexual Morality** Carles Salazar, 2006 The history of sexual morality in Ireland has been traditionally associated with repression. In the last two decades however repression seems to have given way to its exact opposite. But where did this repression originate? And how can we account for this sudden and sweeping transformation in sexual mores? Based on solid ethnographic and historical analysis of sexual morality in rural Ireland augmented by comparative data from Papua New Guinea and being informed by Freud's emblematic concept of repression the author draws new conclusions that not only apply to the specific case of his Irish material but shed new light on the specific nature of an anthropological approach to the study of human societies
