**Music and the Functions of the Brain: Arousal, Emotions, and Pleasure** Mark Reybrouck,Tuomas Eerola,Piotr Podlipniak,2018-04-12 Music impinges upon the body and the brain As such it has significant inductive power which relies both on innate dispositions and acquired mechanisms and competencies The processes are partly autonomous and partly deliberate and interrelations between several levels of processing are becoming clearer with accumulating new evidence For instance recent developments in neuroimaging techniques have broadened the field by encompassing the study of cortical and subcortical processing of the music The domain of musical emotions is a typical example with a major focus on the pleasure that can be derived from listening to music Pleasure however is not the only emotion to be induced and the mechanisms behind its elicitation are far from understood There are also mechanisms related to arousal and activation that are both less differentiated and at the same time more complex than the assumed mechanisms that trigger basic emotions It is imperative therefore to investigate what pleasurable and mood modifying effects music can have on human beings in real time listening situations This e book is an attempt to answer these questions Revolving around the specificity of music experience in terms of perception emotional reactions and aesthetic assessment it presents new hypotheses theoretical claims as well as new empirical data which contribute to a better understanding of the functions of

the brain as related to musical experience      *Translational Applications of Neuroimaging* Stavros Skouras, David M. A. Mehler, Amelie Haugg, 2024-04-04 Despite substantial progress in the development of neuroimaging methodologies translational applications of neuroimaging remain scarce This Research Topic invites article submissions that present promising neuroimaging applications and methods addressing critical needs for improving health outcomes These may include Original Research Clinical Trial Systematic Review or Methods articles that investigate neuroimaging metrics as outcome measures or in combination with neural perturbation techniques e g neurofeedback neurostimulation other translational applications e g guiding neurosurgery To foster debate we also welcome critical Review Opinion and Perspective articles that survey the field and its progress towards clinical utility      *Multiparty and Linked Contracts, Transport Logistics and the Uniform Transport Law* Marta K. Kołacz, 2024-12-11 This book introduces legal aspects of business networks in logistics with the example of shippers co operation in cargo bundling which is the practice of manufacturing and distributing companies shippers consolidating cargo before the engagement of a carrier Shippers agree to co operate and to detect cargo matching opportunities before shipment As a result shippers can organize joint transportation yielding significant efficiency gains in both logistics and sustainability terms However the current legal framework is not adapted to co operation in cargo bundling This book not only clarifies the operation of laws with the special focus on international uniform transport laws but also provides legal solutions facilitating legal certainty in co operation It is the first comprehensive book on the legal aspects of shippers co operation in logistics particularly liability issues in multiparty contracts network contracts and long term contracts in the international carriage of goods domain It is also the first providing an interpretative framework for transport conventions considering new business models and new technologies Proposals are made for solutions at regulatory levels but also for contracts which are especially important because contractual solutions can facilitate shippers to enter co operation and help transport orchestrators operating through online platforms to prepare standard terms and conditions The comparative part of the text features three jurisdictions Poland Germany and England which offer readers an insight into how multiparty context in the carriage of goods operates at the crossroads of national laws and international transport conventions This book is written for interested legal practitioners policymakers lobbying bodies industry professionals logistics management of selling and producing companies and scholars It will also broadly appeal to those dealing with sustainable logistics and concepts such as sharing economy in logistics

Computers and Games for Mental Health and Well-Being Yasser Khazaal, Jérôme Favrod, Anna Sort, François Borgeat, Stéphane Bouchard, 2018-07-12 Recent years have seen important developments in the computer and game industry including the emergence of the concept of serious games It is hypothesized that tools such as games virtual reality or applications for smartphones may foster learning enhance motivation promote behavioral change support psychotherapy favor empowerment and improve some cognitive functions Computers and games may create supports for training or help

people with cognitive emotional or behavioral change Games take various formats from board games to informatics to games with interactive rules of play Similarly computer tools may vary widely in format from self help or assisted computerized training to virtual reality or applications for smartphones Some tools that may be helpful for mental health were specifically designed for that goal whereas others were not Gamification of computer related products and games with a numeric format tend to reduce the gap between games and computers tools and increase the conceptual synergy in such fields Games and computer design share an opportunity for creativity and innovation to help create specifically design and assess preventive or therapeutic tools Computers and games share a design conception that allows innovative approaches to overcome barriers of the real world by creating their own rules Yet despite the potential interest in such tools to improve treatment of mental disorders and to help prevent them the field remains understudied and information is under disseminated in clinical practice Some studies have shown however that there is potential interest and acceptability of tools that support various vehicles rationales objectives and formats These tools include traditional games e g chess games popular electronic games board games computer based interventions specifically designed for psychotherapy or cognitive training virtual reality apps for smartphones and so forth Computers and games may offer a true opportunity to develop assess and disseminate new prevention and treatment tools for mental health and well being Currently there is a strong need for state of the art information to answer questions such as the following Why develop such tools for mental health and well being What are the potential additions to traditional treatments What are the best strategies or formats to improve the possible impact of these tools Are such tools useful as a first treatment step What is the potential of a hybrid model of care that combines traditional approaches with games and or computers as tools What games and applications have already been designed and studied What is the evidence from previous studies How can such tools be successfully designed for mental health and well being What is rewarding or attractive for patients in using such treatments What are the worldwide developments in the field Are some protocols under development What are the barriers and challenges related to such developments How can these tools be assessed and how can the way that they work and for whom be measured Are the potential benefits of such products specific or can these additions be attributed to nonspecific factors What are the users views on such tools What are the possible links between such tools and social networks Is there a gap between evidence based results and market development Are there any quality challenges What future developments and studies are needed in the field

**War of Intervention in Angola** Adrien Fontanellaz,Tom Cooper,José Augusto Matos,2023-06-30 Through late 1987 and early 1988 the battlefields of southern Angola moved ever further away from the border with South West Africa Namibia until the showdown between the Soviet and Cuban supported government in Luanda and South African supported insurgency of UNITA culminated in the controversial and still much disputed Battle of Cuito Cuanavale During this period Angolan and Cuban airpower slowly grew to a point where it outmatched the SAAF in turn limiting the freedom of movement of the SADF

and UNITA ground forces and reducing their operations to attritional battles with little chance of achieving major victories on terms acceptable to the government in Pretoria As the changing political climate between East and West and in Africa began to bring about and end to the South African intervention in Angola and the occupation of South West Africa Namibia the government of Angola was able to switch its attentions to dealing with UNITA Volume 5 of War of Intervention in Angola examines in detail this final period of Cuban involvement in the long and tragic civil war that ruined Angola between 1975 and 1992 While the emphasis is upon the operations of the Angolan and Cuban air forces it also details how these impacted upon the ground operations of all parties This volume is richly illustrated with original photographs of the forces involved specially commissioned maps of the ground operations and a range of full color artworks

**The Handbook of Multimodal-Multisensor Interfaces, Volume 1** Sharon Oviatt,Björn Schuller,Philip Cohen,Daniel Sonntag,Gerasimos Potamianos,2017-06-01 The Handbook of Multimodal Multisensor Interfaces provides the first authoritative resource on what has become the dominant paradigm for new computer interfaces user input involving new media speech multi touch gestures writing embedded in multimodal multisensor interfaces These interfaces support smart phones wearables in vehicle and robotic applications and many other areas that are now highly competitive commercially This edited collection is written by international experts and pioneers in the field It provides a textbook reference and technology roadmap for professionals working in this and related areas This first volume of the handbook presents relevant theory and neuroscience foundations for guiding the development of high performance systems Additional chapters discuss approaches to user modeling and interface designs that support user choice that synergistically combine modalities with sensors and that blend multimodal input and output This volume also highlights an in depth look at the most common multimodal multisensor combinations for example touch and pen input haptic and non speech audio output and speech centric systems that co process either gestures pen input gaze or visible lip movements A common theme throughout these chapters is supporting mobility and individual differences among users These handbook chapters provide walk through examples of system design and processing information on tools and practical resources for developing and evaluating new systems and terminology and tutorial support for mastering this emerging field In the final section of this volume experts exchange views on a timely and controversial challenge topic and how they believe multimodal multisensor interfaces should be designed in the future to most effectively advance human performance

approach provides deeper reflection and focuses specifically on the SADF experience of the war. The result is a more complex picture of the war's dynamics and its legacies. Although South Africa is a vastly different country today, the study of the Border War opens a range of questions also relevant to contemporary deployments such as in Lesotho 1998 and the Central African Republic 2013. It includes the debate on participation in foreign conflicts, on the deployment design and preparation of appropriate modern armed forces and their use as foreign policy instruments in far off theatres, on military planning and as the historical controversies regarding the battles at Cuito Cuanavale and Bangui illustrate on the interface between foreign campaigning and domestic politics.
