

### 8.4 Assembly-Siting

The machine must not be installed outdoors or in environments in which jets of water or steam are used.

The presence of magnetic fields or proximity to electrical machines which generate disturbances could cause the electronic controls of the machine to malfunction. At temperatures close to 0°C, internal parts containing water are at risk of freezing. Do not use the machine under these conditions.

To ensure correct and efficient performance of the appliance, comply with the following recommendations:

- Room temperature: 10°C ÷ 40°C;
- Maximum humidity: 90%;
- The site should be suitably prepared for the installation of the machine;
- The surface on which the machine is installed should be level, solid and stable, with a gradient of max 2°;
- The location should be adequately lit, ventilated and clean, and the power socket should be easily accessible.

Access to the machine and the plug should be kept clear at all times, in order to allow users to easily reach them and to leave the area immediately if required.

The following illustration shows the required access distances:

- To the keypad on the front of the appliance
- To the service units in the event of malfunction.

The machine consists of 2 parts packed in 2 different packages and which should be assembled as described in section 8.6.

After placing the packing container near the installation site, proceed as follows:

- Ensure that the container has not been tampered with during transport and that the original packaging is intact and closed;
- Open the container;
- Check the condition and model of the machine;
- Check the contents of the accessories bag enclosed with the machine (see "8.3 List of Accessories Supplied");
- Remove the machine from its original packaging;
- Remove any remaining packaging from the machine;
- Lift the machine and place it in the designated area.

### 8.5 Disposal of Packaging

After opening the package, it is recommended that the packaging materials are separated according to type and disposed of in accordance with the regulations in force in the country of use.

We recommend keeping the container for future transfers or transportation.

### 8.6 Installing the Container Base

The containers have to be installed at the base of the machine before starting to use the appliance.

- 1 Remove the drip tray and the group compartment drawer to be able to install the containers.
